Technical Information - Release Pack Campus.2024

Last Modified on 10/22/2022 9:27 am CDT

Data Definition Language Scripts (DDL) | New Tables | Modified Tables | Data Manipulation Language Scripts (DML)

These cases are included in the Campus.2024 release pack.

Infinite Campus is moving to update all servers to ICAS (Infinite Campus Application Service) 2.0.6, which incorporates Tomcat 8.5.50 and Java 1.8.0_232

Each ICAS release has a Campus version dependency and will require its own update before moving to a higher version of Infinite Campus. In order to update to Campus.2024, your production site must be on Campus.2016, which will include ICAS 2.0.6.

Cloud Choice and In-District hosted customers on Campus 2012.x or lower, you will not be able to submit an update request for Campus.2024, as it is hidden from the Version dropdown until Campus.2016 has been installed. There are code dependencies in each package that require them to be taken separately, so a district must first request an update to Campus.2016 before you can upgrade to Campus.2024. Your district will only see versions up to Campus.2016.x in the Update Request tool, and not other updates that may have been released, until Campus.2016 and the associated ICAS package have been taken.

Self-hosted customers will need to install the ICAS package before or after updating to Campus.2016.x. For more information on how to install the ICAS package, please see the instructions that have been posted to the Self-Hosted Customers forum.
