

Classroom Navigation - 2227 and Ongoing

Last Modified on 11/15/2022 12:27 pm CST

[Enabling Classroom | Initial Release - Campus.2227](#)

Classroom provides a new section-based paradigm for teachers, compared to the tool-based structure traditionally found in Instruction. When enabled, Classroom collects related tools and presents them within the context of a single section.

Campus.2227 marks the first release of Classroom and additional updates are planned for future releases. This article will be updated for each Classroom release, so check back to see what else is coming.

Enabling Classroom

Classroom is enabled in two parts - for parents and students, and for individual teachers.

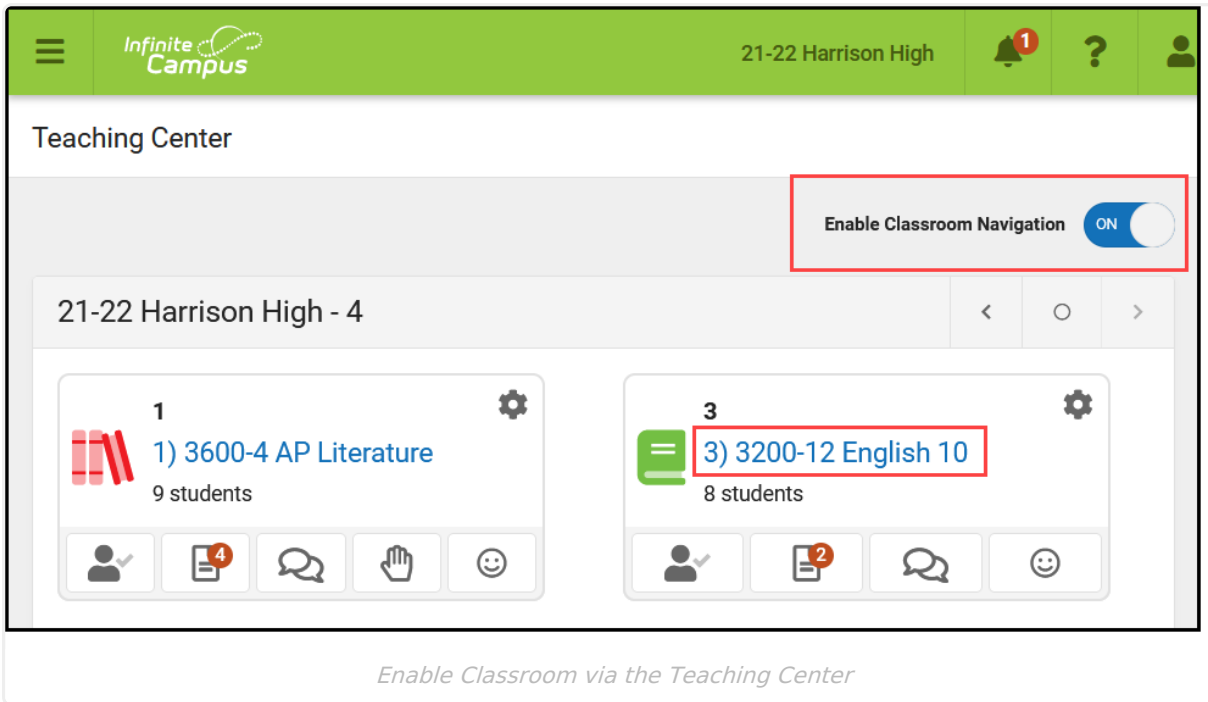

First, a district must enable Classroom for all parents and students in the district via the [Classroom Settings](#) tool. When enabled, parents and students receive a more detailed view in place of the Course Info tab, accessed by clicking the name of a Course Section throughout Campus Student and Campus Parent.

Course Info without Classroom

AP Literature			
COURSE INFO	CURRICULUM	GRADES	UPCOMING ASSIGNMENTS (3)
Teacher Information Teacherson, Katie teacherson@email.com			
Course - Section Number 3600 - 4			
Period 1			
Room 1161			

With Classroom Enabled

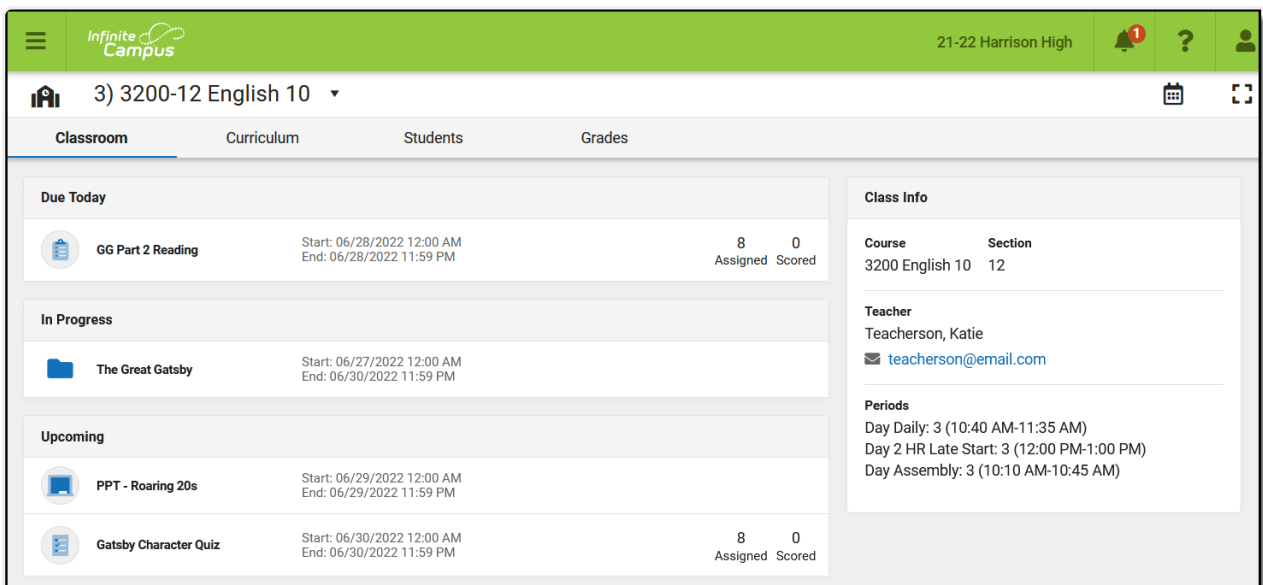

Once the district-level setting is enabled, individual teachers have the option to enable Classroom in their own view via the **Enable Classroom Navigation** in the [Teaching Center](#) (formerly Control Center).

Initial Release - Campus.2227

In conjunction with the release of Classroom, the Control Center has been renamed to 'Teaching Center' for all users. Additionally, tools in the Instruction menu of the navigation have been rearranged. When in the Classroom view, each tool is displayed in the context of that section. Switch sections using the dropdown list at the top, or by using the Home button to return to the Teaching Center (formerly Control Center) and select a different section.

In the Classroom view, tools are divided into four tabs:

A summary of current curriculum displays on the Classroom tab. Click another tab to access more Instruction tools in the context of this section.

Classroom

Classroom provides a summary of the section as well as a list of current and upcoming curriculum, with easy access to assignments, resources, and folders, as well as submissions and scoring.

Curriculum

The Curriculum tab provides the same curriculum functionality found in tools such as the Grade Book and Planner, where teachers can search, filter, and view their curriculum.

Students

The Students tab collects a variety of tools related to classroom administration, such as the Roster, Attendance, and Seating Charts.

Grades

The Grades tab collects grading-related tools such as the Grade Book, Post Grades, and the Progress Monitor.

Check out the [Classroom](#) and [Classroom Settings](#) articles for more information.
