

Campus Learning Usage

Last Modified on 10/22/2022 9:29 am CDT

[Column Definitions](#) | [Data Analysis Options](#)

PATH: *System Administration > Campus Learning > Campus Learning Usage*

The Campus Learning Usage tool tracks how staff are using tools in the Campus Learning offerings. Filter results by selecting a School and Calendar in the Campus Toolbar or view usage for the entire district.

Totals for the School or District are shown in the top table, with totals for individual teachers in the second table.

The screenshot shows the 'Campus Learning Usage' tool interface. On the left is a navigation menu with categories like System Administration, Campus Learning, and Discussions. The main content area displays two tables:

Total 17-18 School Year Counts

Assignments	Grading Services	Curriculum Content		
		Student Instructions	Teacher Notes	Campus File
721	21	332	293	

17-18 School Year Teacher Counts

Remove Teacher Filter | Export to CSV

Teacher ↑ 2	Assignments ...	Grading Services	Student Instructions
Backes, Pearce	301	0	227
Dewey, John	162	21	10
Teacherson, Katie	86	0	36

The Campus Learning Usage tool provides totals for school staff using Campus Learning features.

Column Definitions

Counts are provided for the following features, which are also described in the Column Definitions link:

Feature	Description
Assignments	A base count of all assignments.
Grading Services	Assignments received from an 3rd party learning management system (LMS) through a Digital Learning Partner connection to the OneRoster API .

Feature	Description
Curriculum Content	Files attached to assignments.
Student Instructions	Assignments that have content in the Student Instructions field, which is visible in student and parent views.
Teacher Notes	Assignments that have content in the Teacher Notes field, which is visible only to teachers when looking at the assignment.
Campus File Attachment	Assignments with a file attached that is stored in the Campus Digital Repository (CDR). This field counts both files attached in For Students to be accessible in student views and those attached in For Teachers, which are only visible in the assignment.
Google Drive File Attachment	Assignments with a google drive file attached. This field counts both files attached in For Students to be accessible in student views and those attached in For Teachers, which are only visible in the assignment.
Student Submission	Enabled options allowing students to submit responses.
File Attachment	Assignments set up to accept student responses via files stored in the CDR.
Text Editor	Assignments set up to receive student responses via a text editor.
Google Drive	Assignments set up to receive student responses via google drive files.
Quick Assessment	Assignments that include Quick Assessments .

Data Analysis Options

The Teacher Counts table can be sorted numerically by any of the feature columns.

Click **Filter Teachers** to add a search field to the top of the list.

Click **Export to CSV** to export the table as currently displayed as a CSV file, to be viewed using a program such as Excel.
