

# Learning Interoperability

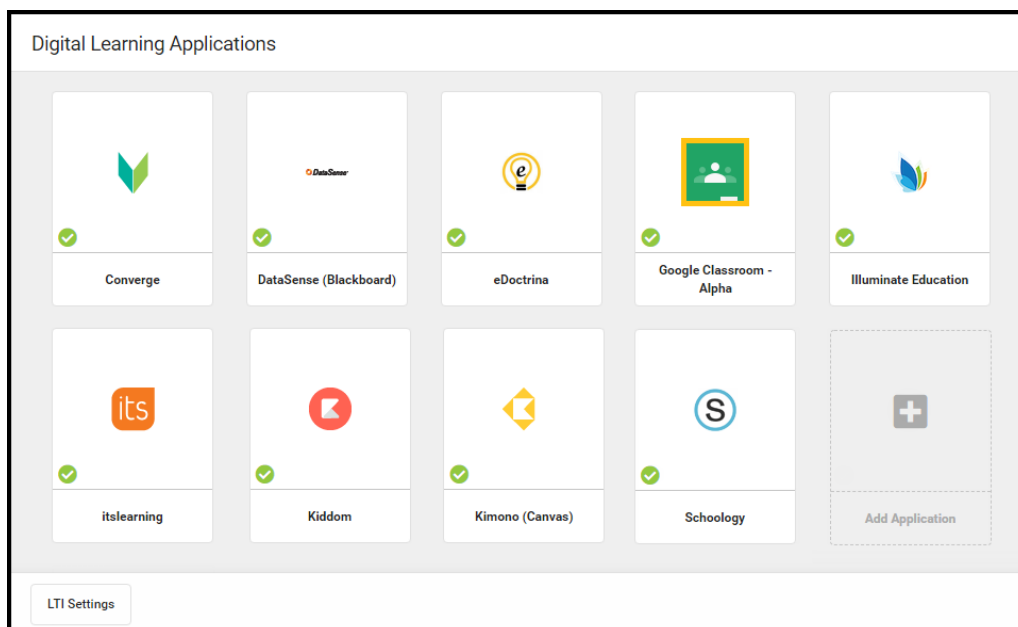

Last Modified on 10/22/2022 9:29 am CDT

[What's the difference between LTI and OneRoster?](#) | [What kinds of connections are available?](#) | [What is a "supported" vendor?](#) | [I don't see my vendor.](#) | [I don't recognize this vendor.](#) | [Settings](#)

This tool is available as part of the Campus Learning premium offering.

**PATH:** *System Administration > Learning Interoperability*

The Learning Interoperability tool allows districts to configure [OneRoster](#) and [LTI](#) connections. Each application the district has connected to displays in a tile, with a  indicating digital learning partners. Connections to partners are supported by Campus.

*The Learning Interoperability tool lists Digital Learning Applications that the district has enabled.*

## What's the difference between LTI and OneRoster?

OneRoster connections allow vendors to request section and roster data from Campus and send assignment, score, and grade data to Campus. LTI connections allow teachers to integrate learning tools with assignments. Students access these tools through [Campus Student](#) and scores are received into the Grade Book where available.

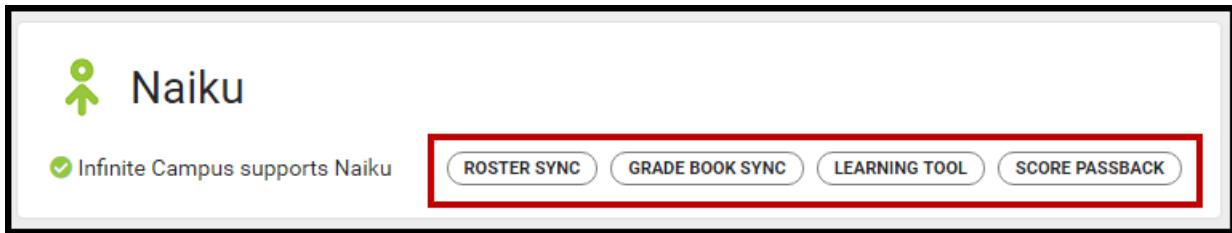

LTI connections are used by teachers who manage assignments and grading in Campus. In comparison, OneRoster connections are helpful for teachers who manage assignments and grading outside of Campus; a OneRoster connection with grade book sync brings assignment and score data from an external program into Campus, where grades can be posted to report cards

and students and parents can track progress through Campus Student and Campus Parent.

Most vendors offer either LTI or OneRoster connections, but some support both.

## What kinds of connections are available?

Click **Add Application** and select a vendor to see what functions are available for each vendor. Lozenges on the right indicate which functions are available and which have been enabled.

The screenshot shows the Naiku vendor interface. On the left, there is a green person icon and the text "Naiku". Below this, a green checkmark icon is followed by the text "Infinite Campus supports Naiku". To the right, there are four lozenges: "ROSTER SYNC", "GRADE BOOK SYNC", "LEARNING TOOL", and "SCORE PASSBACK". The "ROSTER SYNC", "GRADE BOOK SYNC", and "SCORE PASSBACK" lozenges are plain black, while the "LEARNING TOOL" lozenge is green with a checkmark. A red rectangular box highlights these four lozenges.

*Plain black lozenges indicate available functions; green with a checkmark means the function is enabled for that vendor.*

<p><b>✓ ROSTER SYNC</b></p> <p>For <a href="#">OneRoster</a> connections, roster sync allows vendors to request section and roster data from Campus.</p>	<p><b>✓ GRADE BOOK SYNC</b></p> <p>For <a href="#">OneRoster</a> connections, grade book sync allows vendor to send assignment and score data to Campus.</p>	<p><b>✓ LEARNING TOOL</b> For LTI connections, displays the vendor in the <a href="#">Learning Tools</a> list for teachers, students, and parents (if configured). Specific pieces of content from the partner program can also be aligned to assignments.</p>	<p><b>✓ SCORE PASSBACK</b></p> <p>For LTI connections, allows teachers to integrate an assignment in a vendor program with a Campus assignment, score assignments in the vendor program, and have those scores display in their Campus grade book.</p>	<p><b>✓ ASSESSMENTS SYNC</b></p> <p>For <a href="#">OneRoster</a> connections, allows vendors to send assessments and assessment scores to Campus.</p>

## What is a "supported" vendor?

Connections to vendors who are part of the Infinite Campus Digital Learning Partner Program are "supported" vendors. To maintain a supported connection, Infinite Campus and the partner program agree to the following responsibilities:

This information applies to Partners providing a OneRoster connection.

Infinite Campus:	The Digital Learning Partner:
<ul style="list-style-type: none"> <li>• Provides valid credentials that can be used to connect to Campus.</li> <li>• Receives sync requests from the partner system.</li> <li>• Consumes synced data, such as classes, teachers, students, assignments, and scores, into the Campus system, saves it, and makes it available in other Campus tools (such as the Grade Book, report cards, and transcripts).</li> <li>• Maintains data mappings between Campus and the requirements of the OneRoster API.</li> </ul>	<ul style="list-style-type: none"> <li>• Uses the provided credentials (Key and Secret) and the base API URL to connect to Campus.</li> <li>• Sends synced data to Campus that fits established requirements. For example, when syncing assignments and scores, dates must fall within the term dates of the associated Campus section.</li> <li>• Controls what data is synced by how partner data is mapped to endpoints and data elements in the OneRoster API.</li> <li>• Maintains compatibility between the specific way data is set up in the partner program and how that data fits with the requirements of the API.</li> <li>• Controls when data is synced, whether through a periodic, automatic sync or one that is manually triggered.</li> </ul>

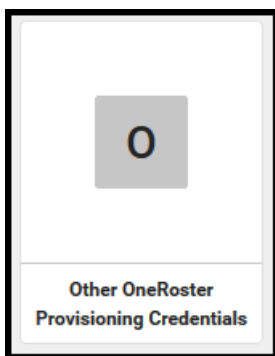

## I don't see my vendor.

Does your district use an LMS or other vendor who is not part of the Infinite Campus Digital Learning Partner Program? You can create a connection to the vendor, but be aware that Campus does not support these connections; Campus Support will not be able to help troubleshoot.

See [Connecting to Non-Partner Vendors](#) for more information.

Have a vendor you think Campus should partner with? Share [this form](#) with the vendor.

## I don't recognize this vendor.

Do you see this vendor in your list? If a district had existing OneRoster connections when Campus released this Learning Interoperability tool, Campus matched connections with recognized vendors based on the name entered by the district. If Campus couldn't determine the vendor based on the name entered, those connections were put here in 'Other OneRoster Provisioning Credentials.

## Settings

The Settings menu includes identifying information for your district's instance of Campus.

This menu also includes an option to **Use Secondary Email addresses for OneRoster 1.1**. Since an email address is required for all students and teachers in a OneRoster connection, this option allows districts to use the Secondary Email entered in [Demographics](#) for all user accounts. This setting does not apply to OneRoster 1.2 connections.
