

View and Manage Notifications

Last Modified on 10/22/2022 9:31 am CDT

PATH: *Campus Instruction > Notification Bell*

Notifications are short, informational messages that likely do not require additional action. See the [Process Alerts](#) article for more information about types of notifications sent to other types of Campus users. Additional notifications will be added in the future for various other tools in Campus.

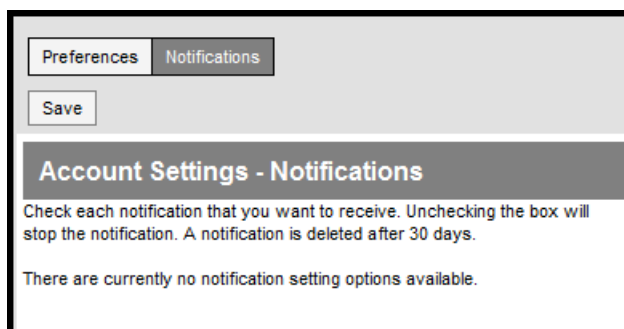

Access notifications by clicking on the bell icon.

Notifications

From this modal, click the **Settings** link to access the Notifications area of Account Settings and indicate which notification you would like to receive. Options will be added to this list as additional notification are added in the future.

Note that some notifications are sent automatically and thus do not have an option to opt out.

Notification Settings

Teachers who also use the Portal as a parent may see notifications that cross platforms if they use the same account to access both applications, with Portal notifications displaying in Campus Instruction and vice versa.
