The Enrollment Overlap Report lists students who are simultaneously enrolled in two or more different schools on the same date. While running the report, students visible under the user's calendar rights enables the visibility of data regarding enrollment overlaps that pertain to other schools in the state.

This report is available in District Edition and in State Edition (called [State Enrollment Overlap Report](#)), and for District Edition users linked to a State Edition.

Enrollment Overlap Report

### Schools available in the Campus toolbar

- **District Edition:** When a year is selected in the School Year dropdown list, the school list is filtered to schools for which the user has rights in the selected year (if the school has at least one calendar).
- **State Edition:** When a year is selected in the School Year dropdown list, the District list is filtered based on districts for which the user has rights in the selected year (when there is at least one calendar in the school for which they have calendar rights).

## Report Logic

The Enrollment Overlap Report returns students who are actively enrolled in a school more than one time, enrolled in two or more schools during the same date range, or enrolled in multiple schools in the same date range in the same school year.

Only enrollments for the selected year and school are included. Only enrollments for selected districts (state edition) are included.
