[Workflow of Treatments](#) | [Create Health Treatments](#)

Classic Path: System Administration > Health > Treatment List

Search Terms: Treatment List

The Treatment List is used to track the treatments that students receive when they visit the Health Office. This list is simply the name of the treatment and a code. This code can be a district-defined listing or based on state approved treatments.

Workflow of Treatments

After [Conditions](#) and Treatments are entered in System Administration, and Conditions are assigned to students on their Conditions tool, Treatments are assigned to those conditions. For students who receive treatments on a regular basis for ongoing conditions, treatment Health Office Visits can be scheduled. All active treatments for a student are available for selection on a Health Office Visit.

Create Health Treatments

1. Select the **New** button. The **Health Treatment List Detail** editor will appear below.
2. Enter a code for the treatment within the **Code** field. This code can be a state code for a certain treatment, a district code, or a number that comes from a health dictionary. It can be

alphanumeric up to 10 characters.

3. Mark the **Active** checkbox to make the treatment available to link to conditions.
 4. Enter a description of the treatment in the **Description** field. This description can be up to 50 characters. It cannot contain special characters like quotation marks or question marks.
 5. Select the **Save** button when finished. The new treatment displays in the Health Treatment List table.
