Health Intervention Type Workflow

After adding the Complaint to the Health Office Visit entry for a student, add an Observation or just add an Intervention. The Item type item is displayed after the intervention name.

The screenshot shows the 'Health Office Visit' form. The 'Intervention(s)' section is highlighted with a red box. It includes a dropdown menu with 'Injury - Cold pack applied' selected. Other sections visible include 'Complaint(s)' with 'Injury, Playground' selected, and 'Observation(s)' with 'Injury - Redness' selected. The form also has fields for Date, Time, Recorded By, Discharge Time, and Appointment status.

Add an Intervention Type

1. Select the **New Intervention Type** icon. The **Health Intervention Type Detail** and **Health Intervention Type Items** editors will appear.
2. Enter the **Name** of the intervention type detail.
3. Mark the **Active** checkbox to have the intervention type appear in dropdown lists found within the Health Office Visits tool.
4. Mark the **Display for Unlinked Complaints** checkbox if the intervention type is meant to be available for Complaints that have no Interventions linked to them.
5. Enter the **Name** of the intervention type item. This field is used to enter supplies, treatments and other items used to complete the intervention. To add additional intervention type items, click the Add Intervention Type Item button.
6. Click the **Active** checkbox to have the item appear on dropdown lists found within the Health Office Visits tab.
7. Select the **Save** icon when finished. The intervention type will appear within the Health Intervention Types editor.
