Search Terms: Vaccine Exemptions

The Vaccine Exemption tool is used to enter vaccine exemptions - *i.e.*, the acceptable reasons for waiving an immunization requirement for a non-compliant student. The most common forms of vaccine exemptions include medical and religious waivers, though other exemptions may be created.

The screenshot displays the 'Vaccine Exemptions' application interface. At the top, there are buttons for 'Save', 'Delete', and 'New'. Below this is the 'Vaccine Exemption Editor' section, which contains a table with columns for Code, Name, Start Date, End Date, and State Exemption. The table lists several exemption codes: M (Medical), L (Lab Verified), R (Religious), C (Personal), H (Hx/Dis), and P (Pertussis). The 'M' code is selected, and its details are shown in the 'Vaccine Exemption Detail' section below. This detail view includes a table with columns for *Code, *Name, Seq, Start Date, End Date, and State Exemption. The 'M' code is entered in the *Code field, 'Medical' in the *Name field, '1' in the Seq field, '10/15/2009' in the Start Date field, '10/09/2015' in the End Date field, and 'M: Medical' in the State Exemption field. Below the table is a list of vaccines with checkboxes, all of which are checked, indicating that all listed vaccines are exempted for this entry.

Code	Name	Start Date	End Date	State Exemption
M	Medical	10/15/2009	10/09/2015	M:Medical
L	Lab Verified			L:Lab Verified
R	Religious			R:Religious
C	Personal			C:Personal
H	Hx/Dis			
P	Pertussis			
-	-			

*Code	*Name	Seq	Start Date	End Date	State Exemption
M	Medical	1	10/15/2009	10/09/2015	M: Medical

Vaccines

- Diphtheria-tetanus-pertussis, combined [DTaP, DTP]
- Tetanus-diphtheria [Td]
- Polio [IPV, OPV]
- Measles-Mumps Rubella [MMR]
- Measles-Mumps-Rubella-Varicella [MMRV]
- Hepatitis B [Hep B]
- Hepatitis B - 2 Dose [Hep B - 2 Dose]
- Haemophilus influenza, type B [Hib]
- Pneumococcal
- Varicella
- Measles
- Rubella
- Mumps
- Tetanus, Diphtheria and Acellular Pertussis [Tdap]
- Diphtheria and Tetanus [DT]
- Polio [IPV]
- OPV
- Influenza
- Meningococcal
- Human Papillomavirus [HPV]
- Hepatitis A [Hep A]
- Rotavirus
- Tuberculosis [BCG]

Image 1: Vaccine Exemption

A district may define its own exemptions; however, doing so may affect state reporting.

Exemptions will appear in health reports and on a student's [Immunizations](#) tool. Exemptions may be added to any existing vaccine. If the vaccine is not required, it does not need an exemption assigned to it.

Add New Exemptions

1. Select the **New** button from the action bar. The Vaccine Exemption Detail editor will display.
2. Enter a **Code** for the exemption.
3. Enter a **Name** for the exemption.
4. Enter a **Seq**(uence) to specify the order in which this exemption will appear in the list of exemptions. This is the order on the Vaccine Exemption editor and in the Waiver dropdown field of the student's Immunization tab.
5. Optional: Enter a **Start and End Date** for the exemption.
6. Flag the checkboxes of the vaccines for which the exemption may apply.
7. Click the **Save** button when finished.

If an end date has been entered for a vaccine exemption, that option will appear in **red** text if the exemption end date is past when [Entering a Vaccine Waiver](#) for a student. If a student already has a waiver assigned to them and an exemption end date is added and past, the name of the waiver and the date of the waiver display in **red** on the student's [Immunizations](#) tool.

Student, Andres D

Grade: 10 #987654321 DOB: 02/03/1999 Gender: M Counselor: Counselor, Kimberly
