Classic Path: System Administration > Medicaid > Medicaid Settings

Search Terms: Medicaid Settings

Medicaid settings are used for electronic billing functionality (not currently available) and other automation controls. Information entered here is the name of the district for the entity associated with the **NPI number (National Provider ID)** that will be used to bill.

1. Enter the name of the district in the **Carrier Name** as the District Name.
2. Enter the district's address in the **Carrier Address** field.
3. Enter the district's city, state and zip in the **Carrier City**, **Carrier State** and **Carrier Zip** fields respectively.
4. Click the **Save** button when finished. Medicaid settings will be updated to reflect the changes.
