RTI Batch Setup

Last Modified on 10/22/2022 9:39 am CDT

Select Plan Type | Prepare Intervention | Add Students | Check Status | Tool Rights

Classic View: Student Information > Response to Intervention > RTI Batch Setup

Search Terms: RTI Batch Setup

The RTI Batch Setup tool is used to assign intervention plans to a group of students. A list of historical RTI batches display on the list screen.

> RTI Batches are school and calendar specific.
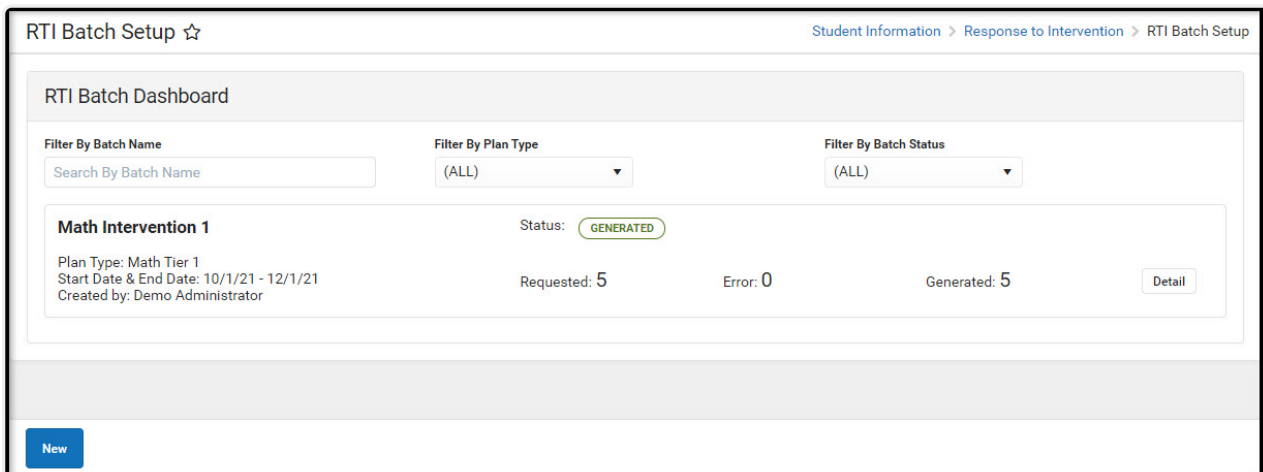

RTI Batch Setup List Screen

Batches can be searched and filtered by Batch Name, Plan Type, and/or Batch Status.

Field	Description
Batch Name	The name of the batch.
Status	The state of the batch. Statuses include: • Generated: plans have been generated. • Generating: plans are currently generating. • Draft: batch is in progress.
Plan Type	The plan associated with the batch. RTI Plan Types are created and managed in the RTI Plan Types tool.
Start Date & End Date	The first and last date of the intervention.

Field	Description
Created by:	The user who created the batch.
Requested	The number of plans requested.
Error	The number of plans that did not generate due to errors while generating .
Generated	The number of plans generated.
Detail	Click the Detail button to view the batch information.

Click **New** to create a new batch. The Select Plan Type screen displays.

Select Plan Type

The **Select Plan Type** screen displays all active plan types available. RTI plan types are predetermined formats which designate the Content Area, Intervention Tier, and editors available within the RTI plan. All plans assigned to a student via the RTI Batch tool display on the RTI Documents tool.

> RTI Plan Types are created and managed in the RTI Plan Types tool.

Select Plan Type Screen

Select a plan type to create. The **Prepare Intervention** screen displays.

Prepare Intervention

The **Prepare Intervention** screen is used to set up the plan for the student(s). Enter a **Name** for the batch and any information into the fillable fields. Any data entered into the form on the Prepare Intervention screen applies to ALL student plans.

Prepare Intervention

Field	Description
RTI Batch Name *Required*	The name of the batch.
Start Date *Required*	The first day of the intervention plan.
End Date *Required*	The last day of the intervention plan.
Universal Screeners Name	The intervention assessment given to students in the school. This is oftentimes the state assessment test (i.e., Wisconsin Knowledge and Concepts Examinations (WKCE), etc). Additional Universal Screener Name values can be added within the Attribute Dictionary.
Universal Screener Score	The score the student received on the Universal Screener.

Field	Description
Plan Description	A description of the plan. You can enter this description manually or select a template bank by clicking the template bank icon. Canned plan descriptions are created in the RTI Template Banks tool.
Base Score	The base score of the RTI plan. Defaults to 0 (zero).
Base Score Comments	Any comments about the base score for the RTI plan. You can enter this comment manually or select a template bank by clicking the template bank icon. Canned base score comments are created in the RTI Template Banks tool.
Goal Name	The name of the intervention goal.
Goal Type	The type of goal for the intervention. This is often used to organize goals for a school.
Goal Score	The score in which the student should receive in order to show successful completion of the intervention. Defaults to 0 (zero).
Goal Score Comments	Any comments about the goal score for the plan. You can enter this comment manually or select a template bank by clicking the template bank icon. Canned goal score comments are created in the RTI Template Banks tool.
Intervention *Required*	The intervention used for the intervention plan. Interventions are tied to specific Content Areas and Intervention Tiers (or all of them if none are specified in the intervention). Each plan type has one content area and one tier. Intervention values are created in the RTI Interventions tool.
Evaluation Method/Tool	The method or tool the intervention provider is going to use to measure the student's intervention progress. This list is set up in the Attribute Dictionary.
Intervention Description	A description of the intervention selected. This value is a read-only description pre-populated by the Intervention value selected. This value is entered and managed in the RTI Interventions tool.
Link	A link to any external or internal resource tied to the Intervention selected. This link is entered and managed in the RTI Interventions tool.

Field	Description
Intervention Provider	The Intervention Provider for the RTI plan. This list is managed in the RTI Intervention Provider tool.
Intervention Position	The position of the intervention provider. This list is managed in the RTI Intervention Positions tool.
Location	The location in which the intervention will be delivered. You can enter the location manually or select a template bank by clicking the template bank icon. Canned location values are created and managed in the RTI Template Banks tool.
Direct Minutes *Required*	The targeted number of minutes the student will receive intervention instruction per intervention delivery event.
Session Frequency *Required*	The number of sessions the student receive per Service Frequency.
Service Frequency *Required*	The frequency in which the student will receive intervention delivery from a Intervention Delivery staff member.

Click **Save** to save progress or **Save & Next** to select students.

Add Students

The **Add Students** screen is used to select which students will have the plan associated with them. The **All Students** section displays all students from the Calendar, Ad hoc Filter, Grade, and/or Blended Learning Group selected. Students can also be searched by Student Name for selection. See the Blended Learning Groups article for more information.

Selecting an individual student's name adds that student to the **Selected Students** list and vice versa.

Add Students

Click **Generate & Next** to create the batch plans, or **Cancel** to go back. The **Check Status** screen displays.

Check Status

The **Check Status** screen is used to view the status of the plans. Statuses on this screen include: Generated, Error, or Deleted.

Note: Individual RTI plans generated using the batch can only be modified on the RTI Documents tool.
