

Daily Health Log Scanning

Last Modified on 10/22/2022 9:41 am CDT

The Scanning toolset is part of the [Campus Workflow Suite](#).

Classic View: Health > Daily Health Log Scanning

Search Terms: Daily Health Log Scanning

The Daily Health Log Scanning tool is used to scan in students for daily health tracking purposes in conjunction with the Daily Health Log tool. Enter a student number or scan in an ID and click **Enter**.

The screenshot shows a web interface titled "Daily Health Log". It features a text input field with the placeholder text "Please scan your student ID *". Below the input field is a blue button labeled "Enter".

Once a student scans in, the Daily Health Log displays.

Add a Daily Health Log Record

See the [Daily Health Log](#) documentation for information on how to enter Daily Health Log records.
