Search Terms: Mailing Labels

The Mailing Labels report generates mailing labels with the dimensions of 1" x 2-5/8", such as **Avery 5160**. Labels can be printed for:

- **Students** - prints a label for each student per household, with the student's name and one guardian name per household
- **Guardians** - prints a label for each person who is marked as a guardian per household
- **Teachers** - prints a label for each teacher in a household
- **Staff** - prints a label for each staff member in a household
- **District Staff** - prints a label for each district staff member in a household and only displays when campus toolbar is set to all schools

The Report Editor includes **Set Up**, **Calendar Picker**, and **Format Options**.

Specific Details about generating each type of mailing label follows.

Mailing Labels Reports

See the [Printing Labels](#) article to review Print Properties prior to printing labels.

Tool Rights for Mailing Labels

Report Logic

The Mailing Labels report prints address mailing labels for students, student guardians, teachers, staff and district staff.

For ALL mailing label types (students, guardians, etc.), the **Mailing** checkbox must be marked on the [Household Address](#) in order for a label to generate. If an address is not marked for mailing, a label does not generate for that address. If more than one address associated with a household is marked for mailing, more than one label generates.

Ended membership records are ignored when determining if a household requires a label to generate. However, if all membership records are ended but the student is still part of a household with an address that is marked for mailing, a label generates with the student's name for both Student labels and Guardian labels.

Additional logic exists for each of the different label types. Review the following information for specific requirements for each label type.

Address Mailing Checkbox

Student Mailing Labels

[Report Logic for Student Mailing Labels](#) | [Household Scenarios for Student Mailing Labels](#) | [Students Mailing Labels Report Editor](#) | [Generate Student Mailing Labels](#)

Student mailing labels print one label per actively enrolled student in a household. Only household addresses marked as mailing addresses are included in the report.

Student labels can be generated by **Grade** or by **Course/Section**:

- The Grade option allows the selection of students using the grade level of enrollment based on the entered Effective Date.
- The Course/Section option allows the selection of students using a specific course and teacher in a particular calendar. Only students enrolled in the selected Course Section on the entered Effective Date print.

<input checked="" type="checkbox"/>	Student, Brynn	234567	04
<input checked="" type="checkbox"/>	Student, Charles	345678	04

Student Mailing Labels by Course/Section

The **Effective Date** entered on the report is used to return ONLY actively enrolled students in the selected calendar(s) on that date. If a student ended enrollment in the selected calendar(s) prior to the entered date, a label does not generate for that student.

When an Ad hoc Filter is selected, the filter is applied to the school chosen from the Campus toolbar. If All Schools is selected, the filter applies to all schools in the district.

Report Logic for Student Mailing Labels

In addition to the Mailing checkbox being marked on the household address, the **guardians** of the student must have the **Mailing** checkbox and the **Guardian** checkbox marked on the [Relationships](#) tab.

Set Up	

Field	Description
<p>Print Mailing Labels For</p>	<p>This selection determines which type of mailing label generated. Select the Students radio button and the Grade radio button.</p> <div data-bbox="480 338 1066 819" style="border: 2px solid black; padding: 10px;"> <p>— Set Up</p> <p>Print mailing labels for:</p> <p><input checked="" type="radio"/> Students</p> <p><input checked="" type="radio"/> Grade</p> <p><input type="radio"/> Course/Section</p> <p><input type="radio"/> Guardians</p> <p><input type="radio"/> Teachers</p> <p><input type="radio"/> Staff</p> <p>Students to include:</p> <p><input checked="" type="radio"/> Grade</p> <p><input type="text" value="08"/></p> <p><input type="radio"/> Ad Hoc Filter</p> <p><input type="text" value=""/></p> <p>Effective Date*</p> <p><input type="text" value="month/day/year"/></p> </div>

Field	Description
<p>Students to Include</p>	<p>Select students by a Grade level or an Ad hoc Filter.</p> <p>All Grade Levels (default selection) can be selected; or, click in the Grade field to select specific grade levels.</p>  <ul style="list-style-type: none"> • When the calendar selected in the Campus toolbar is also the only calendar is selected in the Calendar picker, the grade level selection only displays grade levels from that calendar. • When multiple calendars are selected in the Calendar picker, all grade levels from all selected calendars are available for selected. • When a selected calendar does not have students enrolled in the selected grade level(s), the report does not return data. <p>Or, choose an Ad hoc Filter. Generating the report this way applies the ad hoc filter to all selected calendars when the School dropdown list in the Campus toolbar is set to All Schools. If All Schools is not selected, the Ad hoc Filter only applies to the selected school in the Campus toolbar.</p> <p>Student and Census Data Type filters are available for selection when generating the Student Labels.</p>
<p>Effective Date</p>	<p>The Effective Date is entered in <i>mmdyy</i> format and causes the report to only include enrollment records that are active on the entered date. This means students who ended enrollment BEFORE the entered date do not have a label generate for them.</p>
<p>Calendar Picker At least one calendar needs to be selected in order to generate the report.</p>	

Field	Description
Search Calendars	Search for a calendar by typing in the name of that calendar. Matching results are filtered as the name is entered in the field. Only those calendars to which the calendar has rights are available for selection.
Show Active Year Only	When set to ON, only those calendars for the active school year. When set to OFF, all calendars from all school years are available for selection.
Expand All/Collapse All	Use the Expand All/Collapse All to open and close the list of available calendars.

It is recommended that not all calendars be selected at one time, as this increases the report generation time and could potentially cause server response issues.

Format Options

Field	Description
Include	<p>The following print options are available for generating Student Mailing Labels for Grades:</p> <ul style="list-style-type: none"> • Guardian's Name - When marked, the mailing label includes one person marked as mailing who is associated with the household. The person who is returned on the label is determined by SQL results: whichever person is returned first in the query is listed on the label. In most instances, the person marked as mailing is also a guardian. • Salutation - If desired, a salutation can be included on the label. The default salutation is '<i>To the Parent/Guardian of:</i>'. This can be changed to better address the recipients of the letter. For example, if mailing students, the salutation can be changed to '<i>To the Student:</i>' • Private Mailing Address - The Include Private Mailing Address option prints a label for those addresses marked as Private, in addition to printing labels for addresses not marked as Private. The Private checkbox only marks the address as private (i.e., the household wishes the address to be kept off of external mailing lists); it does not exclude the address from label reports. See this article for more information on the Private checkbox. • Starting Position - If a sheet of labels is missing some labels (not a full sheet of labels), select the Row and Column for where the labels do start. This alters the printing of the labels to begin in the selected Row/Column. The template of the label size is 10 rows by 3 columns. If the first label is missing from the sheet, select Row 2, Column 1. If the first column is missing from the sheet, select Row 1, Column 2. <p>A label can be printed with all of these print options selected. Be aware that when the option for Include Guardian's Name is selected AND the option for Include Salutation, both the guardian's name and the student's name are included on the label.</p> <p>Labels print vertically in the selected sort order, not horizontally.</p>
Sort Order	<p>The Mailing Labels Report can be sorted by either the Student's Name (alphabetical by last name), the City and Name, or the Zip code. The City and Name sort option first sort by the state associated with the address. Sorting by Zip code can be used for bulk mail rates.</p>
Report Format	<p>The report can be generated in PDF or DOCX format.</p>

Course Section Report Type

Field	Description
Set Up	

Field	Description
<p>Print Mailing Labels For</p>	<p>This selection determines which type of mailing label generated. Select the Students radio button and the Course/Section radio button.</p> 
<p>Source Calendar Source Schedule Structure Source Course Source Section</p>	<p>Generating student labels by a course/section requires the selection of one calendar and schedule structure, much like selecting the Calendar and Structure from the Campus toolbar.</p> <p>Only one calendar can be selected, only one course and section can be selected.</p> <p>Select the desired options from the dropdown lists.</p> 
<p>Effective Date</p>	<p>The Effective Date is entered in <i>mmddyy</i> format and causes the report to only include enrollment records that are active on the entered date. This means students who ended enrollment BEFORE the entered date do not have a label generate for them.</p> <p>This field defaults to the current date.</p>

Field	Description
<p>Student Selection</p>	<p>Once the Source fields are populated and an Effective Date are entered, a list of students who are or have been scheduled into the selected section based on the entered Effective Date displays.</p> <p>Select which students to include in the report. By default, all active students in the selected course section are marked. Remove the checkbox next to the their name if they should not be included.</p> <p>Inactive students in the selected section display in red and are not automatically selected.</p>
<p>Format Options</p>	
<p>Label Option</p>	<p>When the Mailing Label option is selected, labels for the selected Course and Section and the selected students print on a standard mailing label.</p> <p>When Student/Teacher is selected, the selected student's name and the selection Course/Section Teacher's name print.</p>

Field	Description
<p>Include</p>	<p>The following print options are available for generating Student Mailing Labels for Course/Section for the Mailing Label option:</p> <ul style="list-style-type: none"> • Guardian's Name - When marked, the mailing label includes one person marked as mailing who is associated with the household. The person who is returned on the label is determined by SQL results: whichever person is returned first in the query is listed on the label. In most instances, the person marked as mailing is also a guardian. • Salutation - If desired, a salutation can be included on the label. The default salutation is '<i>To the Parent/Guardian of:</i>'. This can be changed to better address the recipients of the letter. For example, if mailing students, the salutation can be changed to '<i>To the Student:</i>' • Private Mailing Address - The Include Private Mailing Address option prints a label for those addresses marked as Private, in addition to printing labels for addresses not marked as Private. The Private checkbox only marks the address as private (i.e., the household wishes the address to be kept off of external mailing lists); it does not exclude the address from label reports. See this article for more information on the Private checkbox. • Starting Position - If a sheet of labels is missing some labels (not a full sheet of labels), select the Row and Column for where the labels do start. This alters the printing of the labels to begin in the selected Row/Column. The template of the label size is 10 rows by 3 columns. If the first label is missing from the sheet, select Row 2, Column 1. If the first column is missing from the sheet, select Row 1, Column 2. <p>The following print options are available for generating Student Mailing Labels for Course/Section for the Student/Teacher Label option:</p> <ul style="list-style-type: none"> • Starting Position - If a sheet of labels is missing some labels (not a full sheet of labels), select the Row and Column for where the labels do start. This alters the printing of the labels to begin in the selected Row/Column. The template of the label size is 10 rows by 3 columns. If the first label is missing from the sheet, select Row 2, Column 1. If the first column is missing from the sheet, select Row 1, Column 2. <p>A label can be printed with all of these print options selected. Be aware that when the option for Include Guardian's Name is selected AND the option for Include Salutation, both the guardian's name and the student's name are included on the label.</p> <p>Labels print vertically in the selected sort order, not horizontally.</p>
<p>Report Format</p>	<p>The report can be generated in PDF or DOCX format.</p>

Generate Student Mailing Labels

Student labels print as follows. This example was generated using the Grade level option (all of these students are seniors), and does not include the guardian's name, but does include a salutation and private mailing addresses. The starting position was set to Row 1, Column 1.

Student Labels - Course/Section Option, Student/Teacher Label

Generate the Student Mailing Label Report Using the Grade Level/Ad hoc Format

1. Select the **Students** radio button, and verify the **Grade** radio button is selected.
2. Select the **Calendars** to include on the report.
3. Select the appropriate **Grade Levels** to include on the report, or select an available **Ad hoc Filter**.
4. Enter an **Effective Date** in *mmdyy* format, or use the calendar icon to select a date.
5. Select the desired **Format Options**.
6. Determine how the labels should be sorted by selecting the appropriate radio button, either **Name**, **City and Name** or **Zip**.
7. Select the desired **Report Format**.
8. Click the **Generate** button.

See the [Save Options and Apply Options](#) for information on saving these selections as a template.

Generate the Student Mailing Label Report Using the Course/Section Option with the Mailing Label Format

1. Select the **Students** radio button, and verify the **Course/Section** radio button is selected.
2. Select the appropriate **Source Calendar**, **Source Schedule Structure**, **Source Course**, and

- Source Section** from the dropdown list.
- 3. Enter an **Effective Date** for the report.
- 4. Select the students to include on the labels. All actively enrolled students are selected automatically. If inactive students are in the section, their names appear in red and are not be selected. If a label should generate for inactive students, mark the checkbox next to their name.
- 5. Select the **Mailing Label Option**.
- 6. Select the other desired **Format Options**.
- 7. Select the desired **Report Format**.
- 8. Click the **Generate** button.

To remove the selected Source Calendar, Schedule Structure, Course and Section values, click the **Reset** button. These fields return to having no values selected and other option can be chosen, if desired. The Reset option removes the values in each of the Source fields.

See the [Save Options and Apply Options](#) for information on saving these selections as a template.

Generate the Student Mailing Label Report Using the Course/Section Option with the Student/Teacher Format

- 1. Select the **Students** radio button, and verify the **Course/Section** radio button is selected.
- 2. Select the appropriate **Source Calendar**, **Source Schedule/Structure**, **Source Course**, and **Source Section** from the dropdown list.
- 3. Enter an **Effective Date** for the report.
- 4. Select the students to include on the labels. All actively enrolled students are selected automatically. If inactive students are in the section, their names appear in red and are not selected. If a label should generate for inactive students, mark the checkbox next to their name.
- 5. Select the **Student/Teacher Label Option**.
- 6. Select the other desired **Format Options**.
- 7. Select the desired **Report Format**.
- 8. Click the **Generate** button.

To remove the selected Source Calendar, Schedule Structure, Course and Section values, click the **Reset** button. These fields return to having no values selected and other option can be chosen, if desired. The Reset option removes the values in each of the Source fields.

See the [Save Options and Apply Options](#) for information on saving these selections as a template.

Guardian Mailing Labels

[Guardian Mailing Labels Report Logic for Guardian Mailing Labels](#) | [Household Scenarios for Guardian Mailing Labels](#) | [Guardian Mailing Labels Report Editor](#) | [Generate the Guardian Mailing Label Report](#)

Guardian mailing labels print for each person marked as guardian in the household. The only difference between the Guardian label and the Student label is the ability to print the salutation line with or without the guardian name. The guardian label only prints the name(s) of the guardian.

One label per household prints. If siblings attend the same school, only one label prints for those siblings.

Guardian Mailing Labels

Report Logic for Guardian Mailing Labels

Guardian labels require the household address to be marked as Mailing.

Anyone who is marked as a **Guardian** and as **Mailing** on the [Relationships](#) tab prints on the label. If the household has three guardians living in it, those three guardians print. Each guardian prints on separate lines. If a student has two guardians in the primary household and another guardian in a secondary household, the two guardians in the primary household print on one label and the guardian in the secondary household prints on a second label.

The student must be actively enrolled in the selected calendar in order to have a guardian label generate.

If a student does not have any relationship records with another person marked as guardian, the student's name prints on the label. It is assumed that the student is his own guardian. That means each student, with or without guardians, can receive the mailing.

Activity

Teacher District Assignment Selection

If your district uses Campus HR, the Teacher Role must be selected on the Work Assignment, and the HR Mailing checkbox must be marked under Contact Info.

Campus HR Work Assignment Teacher Role

Campus HR Work Assignment Teacher Role

Teacher Mailing Labels Report Editor

Field	Description
Set Up	
Print Mailing Labels For	<p>This selection determines which type of mailing label generated. Select the Teachers radio button.</p> 
Teachers to Include	<p>All Teachers prints a label for every teacher in the selected calendar, as long as the teacher's district assignment/work assignment, contact information and household address are entered properly (see logic mentioned above).</p> <p>Or, select an Ad hoc Filter. Generating the report this way applies the ad hoc filter to all selected calendars when the School dropdown list in the Campus toolbar is set to All Schools. If All Schools is not selected, the Ad hoc Filter only applies to the selected school in the Campus toolbar.</p> <p>Only Census/Staff Type filters are available for selection when generating the Teacher Labels.</p>
Effective Date	<p>The Effective Date is entered in <i>mmdyy</i> format and causes the report to only include teachers who have an active district assignment on that date. This means if a teacher's District Assignment record was ended BEFORE the entered date, a label does not generate.</p> <p>This field defaults to the current date.</p>
Calendar Picker At least one calendar needs to be selected in order to generate the report.	
Search Calendars	<p>Search for a calendar by typing in the name of that calendar. Matching results are filtered as the name is entered in the field.</p> <p>Only those calendars to which the calendar has rights are available for selection.</p>
Show Active Year Only	<p>When set to ON, only those calendars for the active school year. When set to OFF, all calendars from all school years are available for selection.</p>

Field	Description
Expand All/Collapse All	Use the Expand All/Collapse All to open and close the list of available calendars.
<p>It is recommended that not all calendars be selected at one time, as this increases the report generation time and could potentially cause server response issues.</p>	
Format Options	
Include	<p>The following print options are available for Teachers Mailing Labels:</p> <ul style="list-style-type: none"> • Private Mailing Address - The Include Private Mailing Address option, when selected, prints a label for those addresses that are marked as Private, in addition to printing labels for addresses not marked as Private. The Private label only marks the address as private (i.e., the household wishes the address to be kept off of external mailing lists); it does not exclude the address from label reports. See this article for more information on the Private checkbox. • Starting Position - If a label sheet is missing some labels (not a full sheet of labels), select the Row and Column for where the labels do start. This alters the printing of the labels to begin in the selected Row/Column. The template of the label size is 10 rows by 3 columns. If the first label is missing from the sheet, select Row 2, Column 1. If the first column is missing from the sheet, select Row 1, Column 2. <p>Labels print vertically in the selected sort order, not horizontally.</p>
Sort Order	The Mailing Labels Report can be sorted by either the teacher's name, the City and Name or the Zip code. The City and Name sort option first sort by the state associated with the address. Sorting by Zip code can be used for bulk mail rates.
Report Format	The report can be generated in PDF or DOCX format.

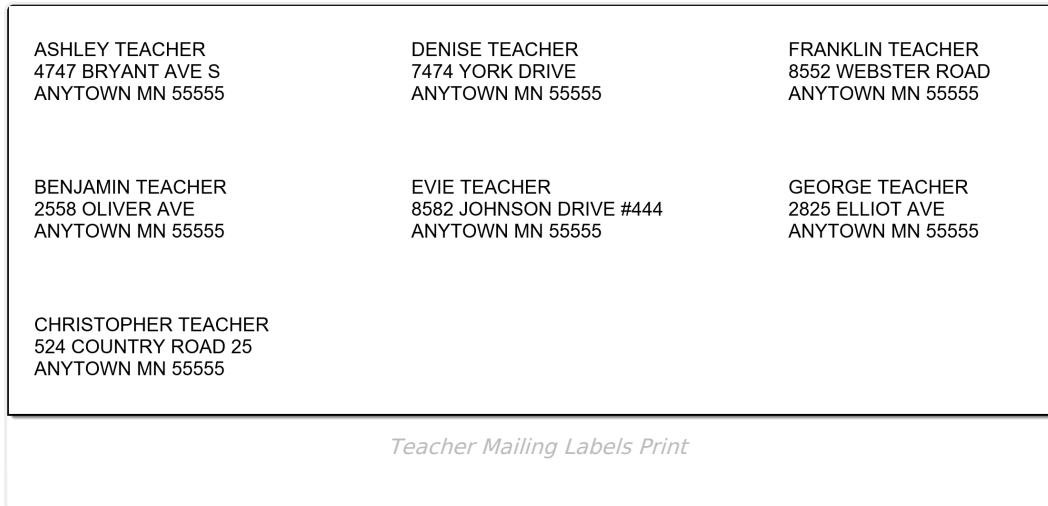

Generate Teachers Mailing Labels

1. Select the **Teachers** radio button.
2. Select the **Calendars** to include on the report.
3. Select either **All Teachers** to include on the report, or select an available **Ad hoc Filter**.
4. Enter an **Effective Date** in *mmddyy* format, or use the calendar icon to select a date. This date is

automatically populated with the current date.

5. Select the desired **Format Options**.
6. Determine how the labels should be sorted by selecting the appropriate radio button, either **Name**, **City and Name** or **Zip**.
7. Select the desired **Report Format**.
8. Click the **Generate** button. The report appears in a new window with the selected options.

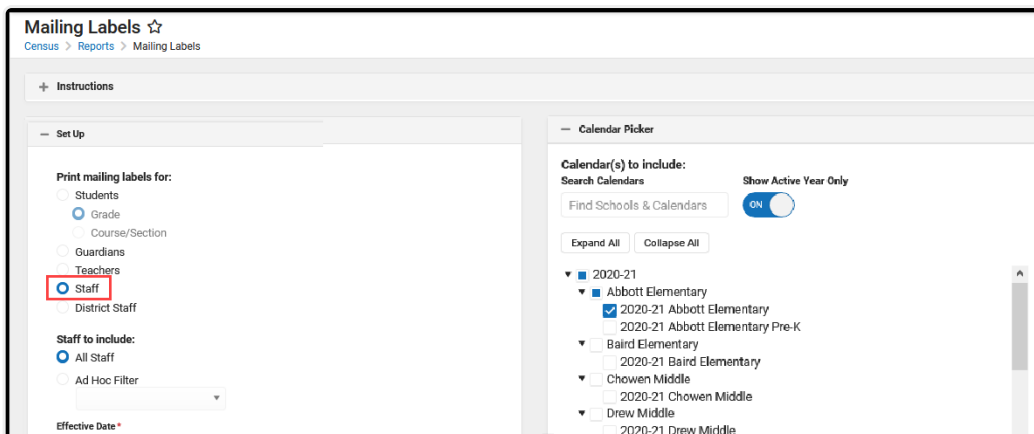

See the [Save Options and Apply Options](#) for information on saving these selections as a template.

Staff Mailing Labels

[Staff Mailing Labels Report Logic](#) | [Staff Mailing Labels Report Editor Details](#) | [Generate Staff Mailing Labels](#)

Staff mailing labels print for those staff who have an active District Assignment record in the selected calendar, or an active Work Assignment in the selected calendar.

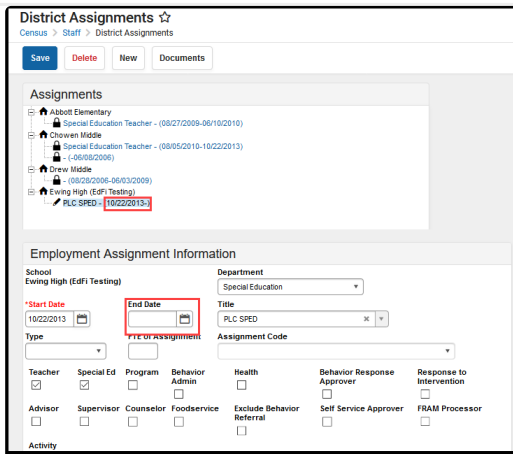

Staff Mailing Labels

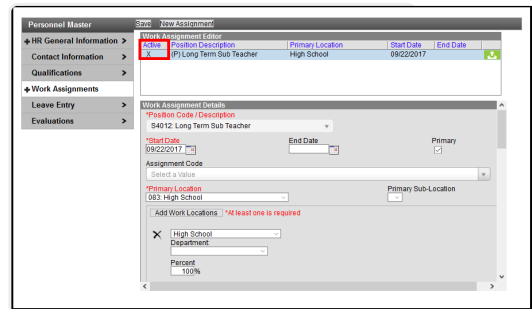

Staff Mailing Labels Report Logic

The staff person must be a member of a household that has an address marked as mailing.

Labels print for staff who have an active District Assignment record or Work Assignment record (for Campus HR) in the selected calendar. Logic does not look at any specific district assignment checkbox or any specific role assignment.

Active Employment Record

Field

Description

It is recommended that not all calendars be selected at one time, as this increases the report generation time and could potentially cause server response issues.

Format Options

Include

The following print options are available for Staff Mailing Labels:

- **Private Mailing Address** - The Include Private Mailing Address option, when selected, prints a label for those addresses that are marked as Private, in addition to printing labels for addresses not marked as Private. The Private label only marks the address as private (i.e., the household wishes the address to be kept off of external mailing lists); it does not exclude the address from label reports. See [this article](#) for more information on the Private checkbox.
- **Starting Position** - If a label sheet is missing some labels (not a full sheet of labels), select the Row and Column for where the labels do start. This alters the printing of the labels to begin in the selected Row/Column. The template of the label size is 10 rows by 3 columns. If the first label is missing from the sheet, select Row 2, Column 1. If the first column is missing from the sheet, select Row 1, Column 2.

Labels print vertically in the selected sort order, not horizontally.

Sort Order

The Mailing Labels Report can be sorted by either the staff person's name, the City and Name or the Zip code. The City and Name sort option first sort by the state associated with the address. Sorting by Zip code can be used for bulk mail rates.

Report Format

The report can be generated in PDF or DOCX format.

Generate Staff Mailing Labels

1. Select the **Staff** radio button.
2. Select the **Calendars** to include on the report.
3. Select either **All Staff** to include on the report, or select an available **Ad hoc Filter**.
4. Enter an **Effective Date** in *mmdyy* format, or use the calendar icon to select a date. This date is automatically populated with the current date.
5. Select the desired **Print Options**.
6. Determine how the labels should be sorted by selecting the appropriate radio button, either **Name**, **City and Name** or **Zip**.
7. Select the desired **Report Format**.
8. Click the **Generate** button. The report appears in a new window with the selected options.

Staff Mailing Labels Print

District Staff Mailing Labels

[District Staff Report Logic](#) | [District Staff Mailing Labels Report Editor Details](#) | [Generate District Staff Mailing Labels](#)

The District Staff labels option is available when the School and Calendar in the Campus toolbar is set to All Schools and looks for those individuals who only have a District Employment record (no District Assignment record). This option is for district office staff, like a Central Registrar or the Superintendent.

District Staff Mailing Labels Print

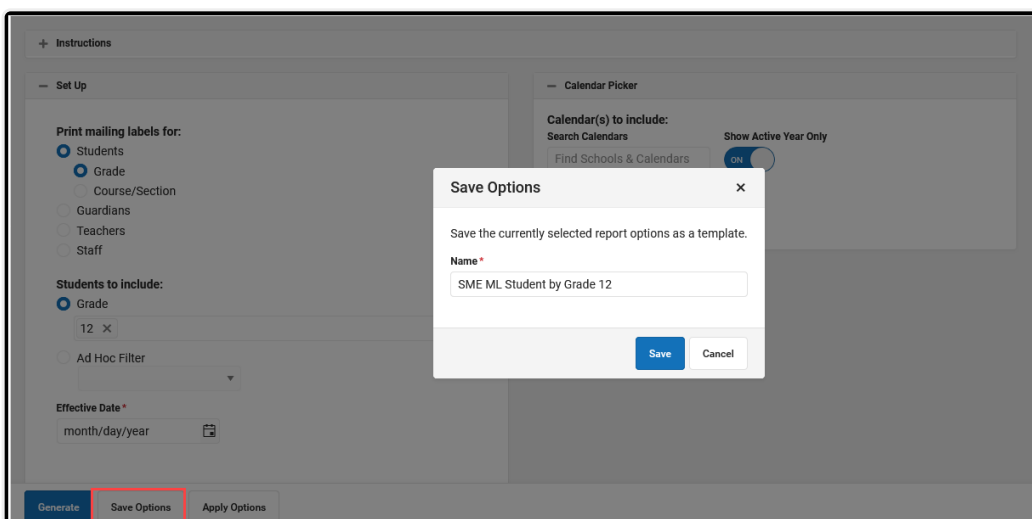

Save Options and Apply Options

Options selected for Mailing Label reports can be saved as a template. This is similar to creating Report Preferences used for Report Cards or Transcripts, where selections are saved and can be generated at a later time.

For users who need a particular set of mailing labels, Student by Course/Section for an AP Course, or Guardians using a particular Ad hoc Filter, for example, saving the options as a template saves time when needing to generate the same list of labels again.

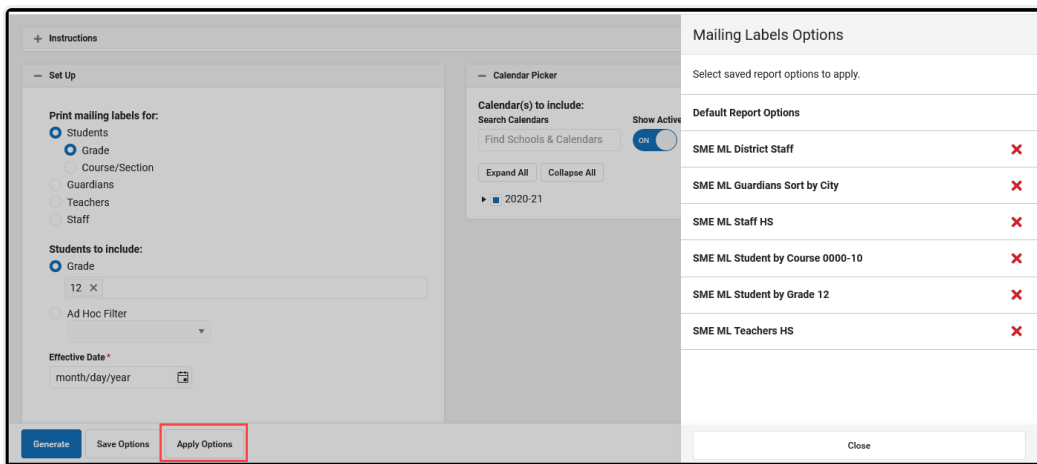

There is no limit to the number of templates that can be created, and each one can be saved with a descriptive name.

These reports cannot be shared with other users who also generate the Mailing Labels Report; these templates are only for the user who created them.

Save Options for Report Generation at a Later Time

Once a name has been entered for a template, it is available in the **Apply Options** side panel. Here, users can select one of their previously saved templates and generate the report. Or, select the **Default Report Options**, which displays the original report options without any special settings.

Apply Options

Templates can be deleted by clicking the red X. Click the **Close** button on the side panel to return to the report options.

Save a Report Template

1. Make the desired selections on the report editor, following the procedures mentioned previously in this article.
2. Test the results by generating the report to verify the labels are what is needed.
3. Click the **Save Options** button and enter a **Name** for the template.
4. Click **Save** when finished. The template is now saved.

All fields that were selected in the report editor are saved on the template, except for the Effective Date.

If specific calendars have been selected for a report prior to choosing a saved template, the calendar selection is cleared and displays the calendars that were selected on the saved template.

Apply Options

When selecting a saved template for generation, the Effective Date must be entered (the current date is automatically populated) and desired Calendars need to be selected.

1. Click the **Apply Options** button. A **Mailing Labels Options** side panel displays.
2. Select the desired template. The side panel closes and the options stored with that selected template display on the report editor.
3. Select the desired **Calendars** to include in this report.
4. Enter the desired **Effective Date**.
5. Click the **Generate** button to print the labels.
