Prerequisites

• Create rules within the Validation Rules tool.

Rules only need to be created if users want to report data on user-defined criteria. Validation Groups can be made using Campus-supplied rules which are populated automatically within the Validation Groups tool.

• Setup groups within the Validation Groups tool.

Tool Rights

The following table describes how tool rights work for the Data Validation Report:

Users **MUST** have at least Read tool rights to the Validation Groups tool in order to generate the Data Validation Report.

ΤοοΙ	R	w	Α	D
Data Validation Report	Users are able to generate a report.			

Generating the Data Validation Report

The Data Validation Report can be generated using previously established Validation Groups.

	Infinite Campus

Data Validation Report Editor

Field	Description
Data Validation Group	Allows the user to select the Data Validation Group that will be used for the report.
Data Validation Group Description	The description of the Data Validation Group being used for the report.

Field	Descriptio	n						
Report Data Source For State-Linked	If a Data Validation Group is State-owned, the report may be generated against the State Edition's database. If 'State Dataset' is chosen, then Report Processing is locked to Batch Queue.							
Only.	Report Options							
	Data Valida Mindmel Data Valida Basic Data Report Data O Local D State D	tion Group * Id Demo -1 ▼ tion Group Description a Health - 4 Source Dataset Dataset						
Output Options	Generate Now	Generates the report immediately after selecting the Generate button.						
	Submit to Batch Queue	Submits the report to that Batch Queue to generate at later time. Users are able to select a date and time for the report to generate. For more information regarding Batch Queue, refer to the Batch Queue article.						
	FormatAllows the user to select whether the report will generate in HTML or CSV format.							
Batch Queue List	Displays a l Queue.	ist of reports that have been submitted to the Batch						
	Start Date	The date range for the list of reports displayed in the Batch Queue List.						
	End Date							
	Report Title	Title of the submitted report.						
	Queued Time	Time the report was generated.						
	Status	Status of the report. When the report is completed, users can click on the 'Completed' link to view the report.						
	Refresh	Refreshes the list of reports in the Queue list.						

Field	Description
Generate	Generates the report.
Reset	Clears the fields in the Data Validation Report editor.

To generate the Data Validation Report:

- 1. Select a **Data Validation Group**. A description of the group displays below the name of the group.
- 2. Select an **Output Option**, either Generate Now or Submit to Batch Queue.
- 3. Select a **Format** for the report, either HTML or CSV.
- 4. Select the **Generate** button. The Report will appear in a separate window in the designated format.

Understanding the Data Validation Report

Understanding the Data Validation Report means understanding what data is being reported per rule within the Validation Group.

The Summary section lists all rules within the report, the number of students (occurrences) and the severity of each report. Rules included in the report are based on rules within the Validation Group being reported.

To quickly access rule information, select the name of the rule within the Rule column. You will be automatically sent to the area within the report where rule data exists.

The columns and information reported for each report is based on how each rule is defined within the Validation Rules tool.
