

PIN Auto Gen Preferences

Last Modified on 10/22/2022 9:51 am CDT

Classic View: Point of Sale > POS Preferences > PIN Auto Generate

Search Terms: PIN

The PIN Auto Generate tool allows users to set constraints for how PIN numbers are automatically generated for food service administrators, cashiers and student/staff members. Manually entered PIN numbers on a patron's [Account Info](#) tool are not required to follow these settings and will not be overwritten unless the PIN field is cleared out first. Account PIN numbers are not duplicated if they currently exist in the district.

Users will receive an error during use of the [Mass Account Creation Wizard](#) if the total amount of PIN numbers needed for newly created accounts exceeds the limits placed within this tool (i.e., the fields within this tool are set to values that cannot accommodate the number of PIN numbers needed for created accounts).

Setting PIN Preferences

1. Select the **PIN Type**. See the table below for more information about each option.
2. Enter the **Min PIN**.
3. Enter the **Max PIN**.
4. Enter the **Number of PIN Digits**.
5. Select the **Save** button.

PIN Preferences can be modified at any time but changes are not retroactive. A PIN that was valid under old settings or entered in manually will not be reset and will remain valid.

Field/Column	Description
--------------	-------------

Field/Column	Description
Type	<p>The type of PIN being created. Options include:</p> <ul style="list-style-type: none"> • Account PIN - Sets parameters for Point of Sale Accounts for students and staff who purchase meals and meal items. • Cashier PIN - Sets parameters for codes needed for logging into Point of Sale terminals prior to processing transactions. • Manager PIN - Sets parameters for certain administrative functions on Point of Sale terminals, such as voiding transactions. These codes are needed for use with both Point of Sale terminals and Cafeteria Serve.
Min PIN	The minimum value allowed for use in generated PIN numbers.
Max PIN	The maximum value allowed for use in generated PIN numbers.
Number of PIN Digits	<p>The amount of digits used when generating PIN numbers.</p> <p>If your district has the Auto creation of PIN - Use Student Number as PIN POS Preference enabled, to avoid creating PINs that conflict with student IDs the Number of PIN Digits should not equal the same number of digits as a student ID.</p> <p>If the Min PIN value set is less than the Number of PIN Digits set, the tool will allow PINs to be created with one or more leading zeros in order for PINs to have the correct amount of digits (i.e., Min PIN set to 500 with the Number of PIN Digits set to 5 would generate 00500, 00501, etc).</p>
