

2022-2023 Eligibility Carryover Process

Last Modified on 10/22/2022 9:52 am CDT

Use of Prior Year Eligibility Determinations for School Year 2022-2023 Carryover (Waiver 26) allows districts to use the most recent student eligibility on file since the 2019-20 school year to carry over to the 2022-23 carryover period. As many parents did not complete benefit applications during the 2020-21 or 2021-22 school year, many districts have a gap in eligibilities that would cause students to not be covered by a 30 day carryover at the start of the 2022-23 school year.

The processes in this document guide district staff through the process of:

- Export student eligibility data from Campus since the 2019-20 school year.
- Clean up data to find the most recent eligibility status for each student.
- Protect existing records to ensure student eligibilities that cover the 2022-23 carryover period are not updated or overwritten.
- Import data to create eligibilities which carry over 30 days into the 2022-23 school year.

This process will result in the creation of new eligibilities in the 2021-22 school year which carries over 30 days into the 2022-23 school year so students will continue to receive free or reduced meal benefits while applications for this year are submitted and processed. *Parents/guardians will still need to submit applications by your district's established processes for the 2022-23 school year.*
