

Immunization Batch Report

Last Modified on 10/22/2022 9:55 am CDT

[Report Logic](#) | [Report Editor](#) | [Generate the Immunization Batch Report](#)

Classic Path: [Health](#) > [Reports](#) > [Immunization Batch](#)

Search Terms: [Immunization Batch](#)

The **Immunization Batch Report** will provide a view of selected students' immunizations. The Immunization Batch report uses data that is entered on a student's Immunization tab. Data should be up to date on this tab for the report to appear correctly.

In order for the report to generate, all individuals included in the report must have a birth date entered on their Identity record. If a birth date is not entered, an error message displays after generating the report.

As of the .1545 release, a localized version of this report was made available for districts in Maryland. See the [Immunization Batch Report \(Maryland\)](#) article for more information.

Batch Immunization Report

Batch version of single student immunization report. 1 page per student suitable for handing out to students. This is a very complex report, so try to limit the number of students run per batch.

Which students would you like to include in the report?

Grade All Students
12+
KF
KH
PK

Ad Hoc Filter ▼

Enrollment Effective Date

This is a very complex report, so try to limit the number of students run per batch.

Report Logic

This report lists every student in the selected grade level and their immunization records that have been entered on the Student Health [Immunizations](#) tool.

If a student is in multiple households and one of those households is marked secondary, and the ONLY address for that Household is marked as Secondary, and the student is marked Secondary for Membership in that Household, only one set of vaccine doses reports.

Report Editor

The following fields are available.

Fields	Description
Student Selection	Choose students either by a Grade Level or an Ad hoc Filter . If by grade level, the list of grades is limited to those grade levels in the selected calendar in the Campus toolbar. If by ad hoc filter, only those students in the filter who are actively enrolled as of the entered enrollment effective date will be included in the report.
Enrollment Effective Date	Entered date returns immunization information for students who are actively enrolled as of that date. Dates are entered in mmddyy format or can be selected by using the calendar icon. If this field is left blank, the report uses the start and end dates of the selected calendar. This field defaults to the current date.
Report Type	In some states, this option displays, allowing users to generate either a General list of student immunization records, or a State Specific immunization report.
Sort Options	The report can be sorted alphabetically by Student (last) Name or by Grade level, with the lowest grade level printing first.
Submit to Batch	Users have the option of submitting a report request to the batch queue by clicking Submit to Batch instead of Generate Extract. This process allows larger reports to generate in the background, without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the Batch Queue article.

Generate the Immunization Batch Report

1. Select the students to include in the report by selecting a **Grade Level** or an **Ad Hoc Filter** from the dropdown lists
2. Enter an **Effective Date** for the report.
3. If available, select the desired **Report Type**.
4. Select the **Sort Options** for the report.
5. Click the **Generate Report** or the **Submit to Batch** button.

The report will display in a PDF (Adobe) document listing the immunizations for the students in the selected calendar.

Student, Anders ID: 123456 Grade: 09 Birthday: 03/15/2000	Immunization Summary Report	10/30/2014 01:44:40 PM Page 1 of 1				
Diphtheria-tetanus-pertussis, combined [DTaP, DTP] - Compliant						
Shots	05/16/2000	07/13/2000	10/05/2001	05/27/2005		
Tetanus-diphtheria [Td] No doses of this vaccine.						
Polio [IPV, OPV] - Compliant
