General Compliance | DTaP | Tdap | Hepatitis B | MMR | Varicella | Polio | Hib

#### Classic Path: System Administration > Health > Vaccines

#### Search Terms: Vaccines

Health vaccines and their associated compliance listings are based on state guidelines. While Infinite Campus maintains standard guidelines for all states, districts have the ability to enter additional compliance information. The following information describes vaccine compliance rules as defined by the New Hampshire Department of Health.

For more information on the creation, modification or deletion of vaccine compliances, see the Vaccines page.

#### **General Compliance**

- Vaccine doses administered less than or equal to 4 days before the minimum interval or age are considered valid.
- Doses administered 5 days before the minimum interval or age are not considered valid and must be repeated as age-appropriate.
- With the exception of Hepatitis B, vaccines given before 6 weeks of age are not considered valid.
- Half doses or reduced doses of a vaccine are not considered valid.
