The Salary Schedule tool allows you to define and maintain pay structures. Since every district has its own schedule, you can use the Salary Schedule tool to set up a chart based on years of experience and education (steps and lanes), or you can set up salary ranges.

Both types of Salary Schedules can be associated with [positions](#) and personnel [work assignments](#) to determine salary or rate of pay.

You may also use the Salary Schedule tool to prepare for future year budgeting, and based on the approved schedule, quickly update employee records.
