

# New Blended Learning Groups

Last Modified on 10/22/2022 10:04 am CDT

[Tools Rights for New Blended Learning Groups](#) | [Blended Learning Information in Ad hoc Query Wizard](#) | [Create Learning Groups and Add Students Manually](#) | [Create Learning Groups and Automatically Add Students](#) | [Edit Learning Groups](#)

**Classic View:** Scheduling > Blended Learning > New Blended Learning Group

**Search Terms:** Blended Learning

Blended Learning allows districts to create and assign learning groups to students to manage classes and attendance for students in a setting that is adaptable for students who are physically in a building for learning, for students who are virtually attendance classes, or a combination of both.

Blended Learning groups provides the first step in reducing in-person class sizes.

Blended Learning tools were first released in the [Campus.2028 Release Pack \(July 2020\)](#). See the [Blended Learning Groups](#) article for an overview of the entire Blended Learning Group process.

NAME	GROUP COLOR	START DATE	END DATE	STUDENTS ADDED	STATUS
Group 1		10/08/2020	10/12/2020	Automatic	ACTIVE
Group 111		10/13/2020		Automatic	ACTIVE
Group 2		10/08/2020	10/12/2020	Automatic	ACTIVE
Group 211		10/13/2020		Automatic	ACTIVE
Group ABC		10/15/2020		Manual	ACTIVE
November BLG		11/02/2020		Manual	ACTIVE
SPA BLG		09/29/2020		Manual	ACTIVE
ipMIN BLG		09/29/2020		Manual	ACTIVE
Virtual Attendance		07/01/2020	10/07/2020	Automatic	ARCHIVED

*New Blended Groups*

The main view of the New Learning Groups tool lists existing groups, their assigned color, their start and end dates, and how students are added to the group.

It also includes the status of each group - either Active or Archived. Archived groups are no longer in use, and can be hidden from this main view by moving the **Show Archived** toggle in the upper right corner from On to Off. When set to Off, only Active groups are listed.

**NOTE the following automatic creation of Learning Groups when your districts updates to Campus.2032 Release Pack (August 2020):**

If your district was using the original COVID-19 Attendance Process for recording attendance for students in the 2019-20 school year BUT Blended Learning Groups have NOT been created, one Blended Learning Group will be created automatically and all students enrolled in a calendar with Enable Covid-19 assignment insert marked will be assigned to that new group.

In addition, that automatic group is then associated with every attendance day in the affected calendar.

Learning Groups can be created with students automatically assigned to the group or students can be added manually to the group.

Create "manual" learning groups first and manually add students to those groups. These manual learning groups would be groups of students who are never virtual or never on-site. Students assigned to these groups are excluded from the automatic student assignment process.

If learning groups have already been created and students have already been assigned, creating additional groups overwrites the current group assignments.

Groups are assigned to all students who have active enrollments in the selected calendars. Logic works to assign students in the same household to the same group, if possible. Groups are also assigned for students who are not members of a household or who are members of a household, but that household is not assigned an address.

## Tools Rights for New Blended Learning Groups

Full access to new Blended Learning requires **RWA** to **Scheduling > Blended Learning > New Blended Learning Groups**.

**Tool Rights** ☆  
User Management > User Accounts > Tool Rights

## Blended Learning Information in Ad hoc Query Wizard

Blended learning information is available in the Query Wizard for **Student Data Type**. Fields are available in the **Learner > Blended Learning** folder. Fields exist for the student's **Active Group Assignment** and **All**

## Group Assignment.

See the [Blended Learning Groups](#) article for more detailed information on Ad hoc information for Blended Learning, including:

- Virtual Today and Virtual Tomorrow logic
- Term Summary and Participation Detail
- Course/Section Data Type and Blended Learning Fields

*Blended Learning Ad hoc Fields*

## Date logic for Blended Learning Groups

Note the following logic for dates as they related to Blended Learning Groups.

- Date fields are auto-populated from the next future date to the last instructional date in the selected calendar.
- When creating a blended learning group, the end date entered in the New Blended Learning Group tool is also added to the database and displays for all student group assignment end dates associated with the group.
- End dates can only be entered for a current or future date.
- End dates are required when editing or adjusting groups.
- Extending a future group end date does not update the student group assignment end date.
- Shortening a future group end date does update or delete any group assignment or day rotation necessary.

## Create Learning Groups and Add Students Manually

Verify the correct School Year is selected in the Campus toolbar.

At any time during this process, use the **Previous** button to return to the previous step or **Cancel** to end the process completely.

Click the **New** button and choose the **Groups: Add Students Manually** option.

Group-SG-3		Manual
Group-SG-4		Manual
Group Black		Automatic
Group White		Automatic
Group 1 sme		Automatic
Groups: Add Students Automatically		Automatic
<b>Groups: Add Students Manually</b>		Automatic

**New**

*Group Creation - Add Student Manually*

## Step 1. Group Information

1. Enter the **Group Name** for the manual distribution of students. Group names can only be used one time per school year.
2. Click **Next**.

New Groups: Add Students Manually

Group Information    Group Day Rotation    Preview    Results 4

Enter a name for manual student distribution group.

**Group Name \***

Manual Student Group

*Manual Group Name Entry*

## Step 2. Group Day Rotation

1. Enter the **Start Date** and **End Date** for the rotation of the groups. These date fields are auto-populated from the next future date (tomorrow) to the last instructional date in the selected calendar. The Start Date can be modified but the End Date cannot.
2. Select the desired **Remote Learning Type**, which determines how students are learning when assigned to this group (virtual instruction with a live teacher, or virtual instruction without a live teacher). This may not be available for all states.
3. If desired, mark the **Exclude Summer School Calendars**. This prohibits Blended Learning Groups from being created for any calendar that is marked as a Summer School Calendar (System Administration > Calendar > Calendar > Calendar Information > Summer School).
4. Choose the desired option for **Assign Group Rotation - Do Not Assign Group to Calendar Days (Always in School)** or **Assign Group to Every Calendar Day (Always Virtual)**.
5. Click **Next**.

New Groups: Add Students Manually

Group Information    Group Day Rotation    Preview    Results

Enter parameters to rotate the group across calendar days. Groups that are assigned to a day are expected to be virtual.

Start Date \*  
01/30/2021

End Date  
06/30/2021

Remote Learning Type \*

Exclude Summer School Calendars

Manual Group Day Rotation

### Step 3. Preview

1. Verify the desired **Group Name** and the **Assigned Group Rotation** is correct.
2. If yes, click the **Finish** button to create the groups and assign students to those groups. If not correct, click the **Previous** or **Cancel** buttons to being the process again.

New Groups: Add Students Manually

Group Information    Group Day Rotation    Preview    Results

Preview selections prior to creating group and assigning day rotation.

Group Name  
Manual Student Group

Assigned Group Rotation  
No days

Manual Group Preview

### Step 4. Results

The group is created and depending on the Group Rotation option, days are either assigned or not assigned. When finished, a summary of the groups and number of students assigned displays.

Use the [Adjust Blended Learning Groups](#) tool to manually add students to learning groups or to adjust the day assignment of the groups.

Click **Close** or **Repeat** to begin the process again.

Manual Student Assignment Results

## Create Learning Groups and Automatically Add Students

Verify the correct School Year is selected in the Campus toolbar.

At any time during this process, use the **Previous** button to return to the previous step or **Cancel** to end the process completely.

Click the **New** button and choose the **Groups: Add Students Automatically** option.

Group Creation - Add Students Automatically

### Step 1. Group Information

1. Enter the **Number of Groups** needed for distributing students.
2. Enter the **Group Names** for each group. Group names can only be used one time per school year.
3. Click **Next**.

Group Information    Group Day Rotation    Preview    Results

Determine the number of Blended Learning Groups needed for student distribution. This value needs to be large enough to accommodate your largest building. You may modify the Group Names to be meaningful for your buildings.

Any automatic groups created prior to running this tool will be deleted (if today is before the start of school) or end dated (if today is after start of school). Student membership in a group will likely change.

Number of Groups\*  
3

Group 1 Name\*  
Virtual Group MW

Group 2 Name\*  
Virtual Group TTh

Group 3 Name\*  
Blended Group F

Cancel    Next

*Group Information Entry*

## Step 2. Group Day Rotation

1. Enter the **Start Date** and **End Date** for the rotation of the groups. These date fields are auto-populated from the next future date (tomorrow) to the last instructional date in the selected calendar. The Start Date can be modified but the End Date cannot.
2. Select the desired **Remote Learning Type**, which determines how students are learning when assigned to this group (virtual instruction with a live teacher, or virtual instruction without a live teacher). This may not be available for all states.
3. If desired, mark the **Exclude Summer School Calendars**. This prohibits Blended Learning Groups from being created for any calendar that is marked as a Summer School Calendar (System Administration > Calendar > Calendar Information > Summer School).
4. If desired, select which **Calendars to Exclude from the Student Distribution** process. Use the **Select All** button to add ALL calendars in the district (remove them by clicking the X), or enter the start of the school name or part of the school name (e.g., High to find all high schools).
5. Enter the **Number of Days in the Rotation**.
6. Choose which groups are assigned to which rotation days. Use the **Select All** button to add ALL groups to the Days in Rotation fields.
7. Click **Next**.

*Calendars and Day Selections*

## Step 3. Preview

1. Verify the desired Number of Groups and the desired **Number of Days in Rotation** is correct.
2. Click the **Finish** button to create the groups and assign students to those groups.

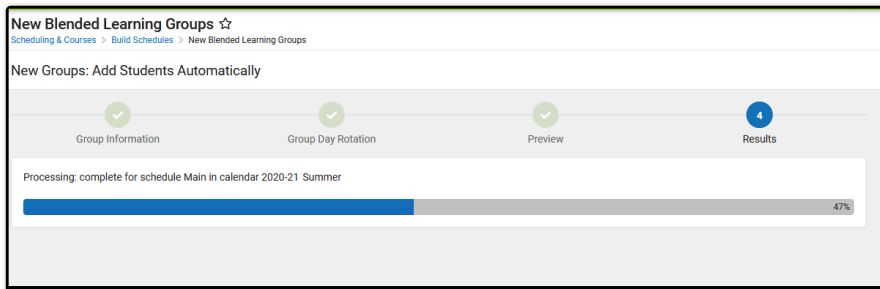

*Blended Learning Preview*

## Step 4. Results

The groups are created and students are assigned to the groups. Depending on the number of students in the calendar and the number of groups created, this could take some time.

A status showing the completion of the group assignment displays, along with a percentage of how far the process is.

*Process to Completion*

When finished, a summary of the groups and number of students assigned displays.

Click **Close**.

*Summary Results for Groups and Student Assignment*

During the process, database connections may be lost. If that occurs (a warning message displays), do the following:

- Check the database to see if Blended Learning Groups were created.
- Choose the New Blended Learning Group tool from the outline to see if your new groups were created

If the new groups are not listed either in the database or in the product, choose the Groups: Add Students Automatically to resync the process.

Depending on the dates entered for automatic learning groups, a gap in group assignments might occur, where there is no assignment for the students. When this occurs, the process automatically detects a gap and displays a message in the header text of the editor if a gap is found. Group Day rotations will need to be manually adjusted.

## Edit Learning Groups

To modify an existing group, click anywhere in that group row. This opens a side panel where updates to the group can be managed.

- Modify the group's **Name**. Group names can only be used one time per school year.
- Change the **Group Color** and selected icon that's associated with the Learning Group - a person with circle or person without a circle. Click the arrow next to the color block to assign a different color.
- Enter an **End Date** for the group.

- Only groups with an end date in the future or no end date can be updated with a new end date. A message displays indicating the Assignment End Date for all students assigned to the group will be updated to end on that day, and that virtual day rotations after that date will be deleted.
- End Dates must be after the start date of the group, and can be entered for the current date or a date in the future.
- End Dates must be on or after the current date and on or before the last day of the calendar.
- Change the **Status** of the group, from Active to Archived. Only groups that have an end date in the past can be marked as Archived. Groups marked as Archived display at the end of the list of groups with a red Archived label in the Status column.
  - This field is included in the Query Wizard to use in Ad hoc Reports using the Student Data Type (Learner > Blended Learning > All Group Assignment > **archived**).
  - **NOTE:** Only automatic groups that have been replaced with other automatic groups have an end date. In a future release, the ability to manually end date groups will be available.

Then click **Save** when finished. Changes to the group names, icons and colors are instantly updated and can be seen on Student Attendance, Student Schedule and everywhere else icons and group names display.

The screenshot shows the 'New Blended Learning Groups' interface. On the left is a table of existing groups, and on the right is a modal form for editing 'Group 1'.
