

Scheduling Center - Video

Last Modified on 10/22/2022 10:05 am CDT

The Scheduling Center is a panel where users can view a summary status for different scheduling-related elements of Campus.

Staff must be given tool rights to see the Scheduling Center, and they must have appropriate rights to the tools shown in the Center to access and use tools via the Scheduling Center to review information, complete tasks and run reports.

Scheduling Center is part of an ongoing project to enhance scheduling tools throughout Campus. Since the May 2022 release of Scheduling Center (when this video was made), a Blended Learning Card has been added and updates made to descriptive text found on each card to more accurately inform staff of the current status of the overall scheduling process at their school.
