

OLR Lists Bank

Last Modified on 10/22/2022 10:08 am CDT

This documentation applies to both versions of Online Registration.

Classic View: System Administration > Data Utilities > Multi-Language Editor > OLR Lists Bank

Search Terms: OLR Lists Bank

[OLR Lists Bank Editor](#) | [Enter List Bank Translations](#) | [Map Health Conditions](#)

The OLR Lists Bank allows users to display the translation of the dropdown lists that display on the Online Registration portal pages. Unlike the [OLR Literals Bank](#), the OLR Lists Bank only changes the text of the items in the dropdown list, not the names of the fields.

When the Translation column is populated, that entry displays for people who have chosen that language.

To access the this tool, users must also have [tool rights](#) to the [Language Groups](#) tool.

OLR Lists Bank

Configuration * Language Group * OLR List Bank *

2021 English person-language

Translation	Description	Code	Seq
	English	eng	1
	Spanish	spa	2
	Abkhazian	abk	3
	Achinese	ace	3
	Acoli	ach	3
	Adangme	ada	3
	Adyghe	ady	3
	Afar	aar	3

[New List](#) [Save](#)

OLR Lists Bank

OLR Lists Bank Editor

The following items display on the editor.

Field	Description
Configuration <i>Required</i>	The year associated with this configuration.

Field	Description
Language Group <i>Required</i>	The language for the translation.
OLR List Bank <i>Required</i>	This tree lists every field that can be given translated text in the selected language. English values are automatically entered; districts just need to populate the text for other languages that meet the needs of the users.
Translation	Displays the translated text of the available options.
Description	Displays the original text of the available options.
Code	Lists the assigned code for the options. This should not be modified.
Seq	Determines the order in which the translated text displays. If this value is not populated or is the same for all options, the items display alphabetically by Translation.

Enter List Bank Translations

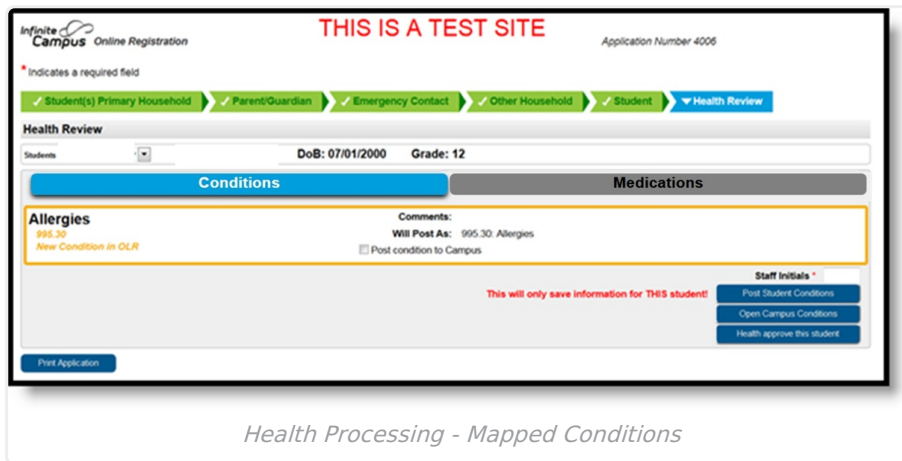

1. Select the field from the **OLR Lists** dropdown for entering translated text. A **Translations** editor displays.
2. Enter the **Translation** that corresponds to the **Description**.
3. If desired, enter the **Sequence**.
4. Repeat as needed, using the **Add Translation Dictionary** button to add more rows.
5. Click the **Save** button when finished. The saved text is visible on the Online Registration portal pages.

Map Health Conditions

Locate and have available the **Description** and **Code** of the health condition from the [Condition List](#) (System Administration > Health > Condition List).

1. Select the **Person - Health Conditions** from the **Language Group/OLR Lists**.
2. Enter the **Description** and **Code** from the **Condition List** for the conditions that should be mapped on the List Bank Translations tool.
3. Save the entry.

The Health Staff Processing tool displays the mapped conditions.

Health Processing - Mapped Conditions

To map the medical/mental health conditions:

- Mark the **Post condition to Campus** for each condition that should be mapped.
- Staff need to add their initials.
- Open the conditions to review or post student conditions.

Verify the conditions are there by clicking the Medications tab on the Health Processing view. Medications do NOT post automatically.

If districts use the optional **Type** field when entering conditions into the [Condition List](#) (System Administration > Health > Condition List), the Type and Condition must be entered together, with no spaces, in the OLR Lists Bank Code field.
