

Verification Summary (District)

Last Modified on 10/22/2022 10:08 am CDT

Classic Path: [System Administration](#) > [Data Interchange](#) > [Verification \(District-level\)](#)

Search Terms: [Verification Summary](#)

The district-level Verification Summary tool analyzes data synchronization results between district and state-level records. The tool also contains the [Verification Summary Report](#), which can be used to identify specific data issues.

State-level users should refer to the [Verification Summary \(State\) article](#).

This tool is only available to district and state-level users connected to an Infinite Campus State Edition product. This page contains the features of the tool available to district-level users.

This article includes the following topics:

[Verify Data](#) | [Analyze Verification Results](#) | [Generate the Verification Summary Report](#) | [Verification Results Table Fields](#) | [Related Tools](#)

2019-2020 DIS Verification Results			Verification Results for 275 JEFFERSON COUNTY PUBLIC SCHOOLS

Verification Tool (District Level)

The Verification Summary tool provides information on data inconsistencies in the following areas:

- Behavior Records
- Employment Records
- Employment Assignment Records
- Enrollment Records
- Graduation Records
- LEP Records
- Person/Identity Records
- LEP Records
- Test Scores

Infinite Campus recommends using this tool regularly to promote early identification of data inconsistencies between district and state levels, including missing and/or duplicate records. Summaries of existing and potentially erroneous records will be shown for both the district and state levels. Users may wish to analyze the data returned by this report in conjunction with manually re-syncing data through the [Resync State Data \(District\)](#) tool.

Not all differences shown in the Verification Summary reports are failures. Some data may reflect expected differences.

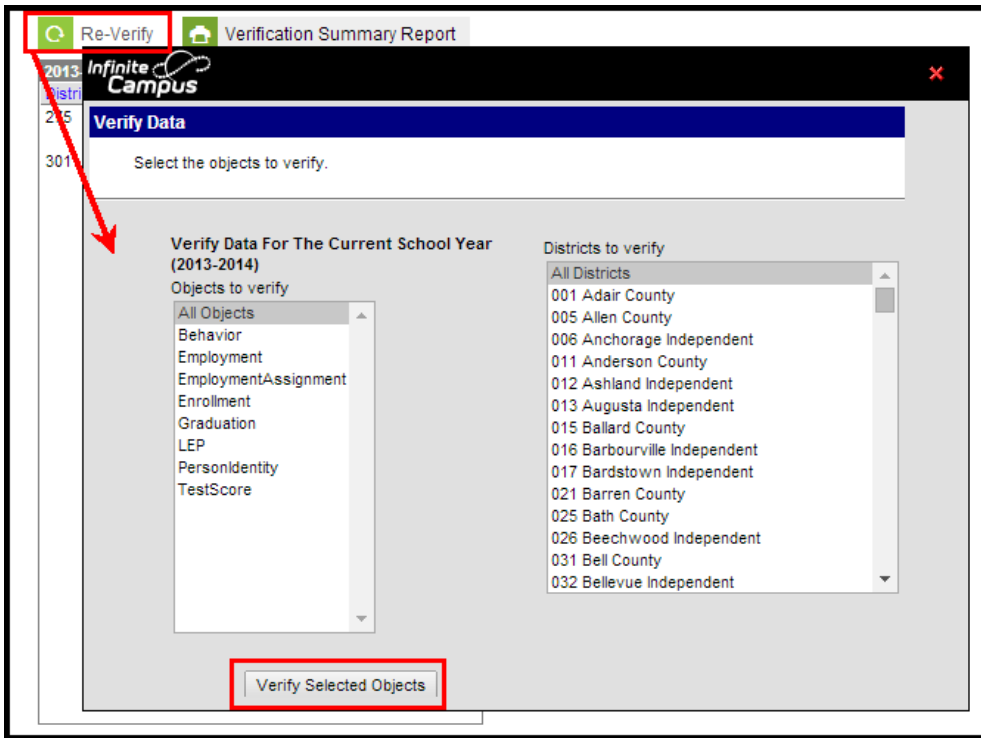

The database tables that store information related to this tool are the *DISVerificationResult* and the *DISVerificationDifference* tables.

Verify Data

The state may have disabled district-level use of this feature (through the state-level [Verification Settings](#) tool).

The Verification Summary tool can be used by a district to identify differences in student and staff data that might exist between the district and state-level databases.

In general, verifications are run on the current school year, though districts/states that sync data for multiple school years will have the additional ability to [verify data from the previous/next school year](#).

Verify Data (for Current School Year)

Verify Data from the Current School Year

1. Click the **Re-Verify** icon from the action bar. The Verify Data wizard will appear.
2. Select the **Objects to Verify** (described in the table below).
3. Click the **Verify Selected Objects** button. The verification process will begin.

Object	Description
All Objects	Verify all objects (see verification manner for each object below).
Behavior	Verify behavior records exist in both the district and state, checking for differences in the following fields: Behavior Event, Behavior Type, Behavior Resolution Type, Behavior Role, Behavior Resolution, Behavior Incident GUID and the date in which the behavior event occurred.
Employment	Verify staff district employment records exist in both the district and state, checking for differences in the record's Start Date and/or End Date.
EmploymentAssignment	Verify staff district assignment records exist in both the district and state, checking for differences in the record's Start Date and/or End Date.
Enrollment	Verify student enrollment records exist in both the district and state, checking for differences in the following fields: Grade Level, Service Type, Start Date, End Date, Start Status and/or End Status.

Object	Description
Graduation	<p>Verify student graduation records exist in both the district and state, checking for differences in the following fields: Diploma Date, Diploma Type, Diploma Type (BIE), Date First Entered 9th Grade and/or NCLB Cohort Year. Verification will only check graduation records of students with a high school enrollment in the verified year.</p> <div style="border: 1px solid #ccc; background-color: #fff9c4; padding: 10px; margin-top: 10px;"> <p>For proper reporting of graduation records, all local high school grades must be mapped to a state grade that is matched to a federal NCES grade level of 9, 10, 11 or 12 in the stateGradeLevelDefinitions table.</p> </div>
LEP	Verify student LEP records exist in both the district and state, checking for differences in the following fields: Program Status, Identified, Expected Exit Date, Exit Date, First Year Monitoring, Second Year Monitoring, Parent Notified Date, Parent Declined.
PersonIdentity	Verify person/identity records exist in both the district and state, checking for differences in the following fields: Last Name, First Name, Middle Name, Gender, Birth Date, SSN, Person GUID, Race/Ethnicity, State ID and/or Staff State ID.
TestScore	Verify test scores of state published tests exist in both the District and State Editions, checking for differences in the following fields: Date, Scale Score, Raw Score and Percentile. Only test scores associated with the verified year will be checked.

Processing time will depend on a variety of factors, including bandwidth limitations, state-level settings and pending requests. The **Timestamp** column of the Verification Results table will display a "(!)" after an existing date or an N/A value for the column of the requested verification while the process completes.

255	Henry County	100.00%										
261	Hickman County	99.18%										

Status: Pending (05/30/2014 15:22:14)

Pending - Verification In-Progress

Verification Progress

All verification requests go through four stages: **Pending**, **Requested**, **Processing** and **Complete**.

Requests begin in the pending stage, where the [Task Scheduler](#) tool is used to throttle the number of verifications run at a time. If the maximum number is reached, the remaining requests are held in the *Pending* status until space opens up. The status moves to *Processing* once the data is received. When all data is received and the request is done, the status is *Complete*.

A user may need to manually refresh the tool to see completed results. To refresh results, click the Verification tool in the Index or the Verification Summary tab. Then select the appropriate entry in the DIS Verification Results editor to open the table and review results.

The Verification Summary tool only displays the most current results; it does not log historical results. Therefore, a user may wish to use the [Verification Summary Report](#) button to generate a copy of verification data that can be saved for historical purposes.

Verify Data from the Previous or Next School Year

Some districts may have the ability to verify data from the previous and/or next school years, if that district currently syncs data from multiple school years. These districts should review the information on the [Syncing Data from Multiple School Years](#) page before attempting to verify data from the previous and/or next school year.

If the district syncs data for the previous and/or next school year, this tool will allow verification of that data. The user should set the **Year** field of the Campus toolbar to the appropriate year and follow the [standard steps for verifying data](#).

Analyze Verification Results

The Verification Results table displays results of the last verification, regardless of whether it was requested by the district or the state. Results are displayed in a statistical format and include all schools in the district. Select the district name in the DIS Verification Results editor to view the latest set of results.

Not all differences shown in the Verification Summary reports are failures. Some data may reflect expected differences.

2012-2013 DIS Verification Results			Verification Results for 224 Greenup County

Completion Status of Verification

Hovering the mouse over the link in the **Timestamp** column will indicate the current status of the verification.

If the verification has been requested and/or is still processing, an exclamation point "!" will appear in the **Timestamp** column. Hovering the mouse over it will indicate a status of "Pending" and the date/time the request was initiated.

Review Specific Data Errors

The details of completed verifications are available by selecting a link from the **Timestamp** column of the Verification Results editor.

Link to Verification Detail Report

Selecting a hyper-linked time from the Timestamp column will generate a report with summary information and the specific records identified as erroneous. This report is broken into the following three sections.

Header/Syncing Rules

The top of the report describes the logic used to compare existing records between state and district as well as syncing rules to consider when analyzing report data.

0902 Butte School District #1 District <small>Generated on 10/05/2012 02:57:41 PM Page 1</small>	Enrollment Verification Report <small>Comparison of District Enrollment Data With State Data Butte School District #1 Verified: 02/08/2012 10:14</small>
--	---

Enrollment Verification Results

The Enrollment Verification will compare all enrollment records existing at the district and state in the school year selected for verification. The Details column of the report may suggest a reason related to record differences.

Enrollment Sync Rules

Local and/or state-level settings may intentionally prevent syncing of certain enrollments. The following criteria can prevent enrollments from syncing:

- Individual Enrollment marked as state exclude
- Grade Level marked as state exclude
- System Preference - Enrollment Overlap Behavior ("Strict Prevent with Syncing" value only)
- System Preference - Accept State Excluded Grade Levels and Enrollments ("No" value only)
- Unmapped State/Regional Grade Levels

The success of Enrollment object syncing depends on the successful syncing of these parent objects:

1. District
2. Reporting Entity*
3. School
4. Calendar
5. ScheduleStructure
6. StructureGradeLevel
7. PersonIdentity

*Localized object, not applicable to all customers

Example of Enrollment Verification Detail Report - Header

District Verification Summary

The District Verification Summary lists the amount of records at district and state, the amount of records missing at both district and state and how many records have field differences when comparing values between district and state for each school in the reporting district.

District Verification Summary					
Total	District Count	State Count	Missing At State	Missing At District	With Field Difference
Butte School District #1 - ALL	4174	4172	2	0	0
11-12 Butte High School	1284	1284	0	0	0
11-12 East Middle School	638	638	0	0	0
11-12 Emerson Elementary	378	377	1	0	0
11-12 Hillcrest Elementary	390	390	0	0	0

Generate the Verification Summary Report

The Verification Summary tool does not log historical verification results shown in the Verification Results table. To save verification data for historical purposes, generate the Verification Summary Report.

Generate Verification Summary Report

To ensure that the Verification Summary Report reflects the most current data available, Infinite Campus recommends generating it directly after running a new verification.

To generate a report with the results of the last verification:

1. Click the **Verification Summary Report** icon located in the action bar. The Verification Summary Report editor will appear.
2. Select the applicable **Objects to Include in the Report** (described in the table below).
3. Select the appropriate style from the **Format** field of the report and click the **Generate Report** button.

Object	Description
All Objects	Verify all objects (see verification manner for each object below).
Behavior	Verify behavior records exist in both the district and state, checking for differences in the following fields: Behavior Event, Behavior Type, Behavior Resolution Type, Behavior Role, Behavior Resolution, Behavior Incident GUID and the date in which the behavior event occurred.
Employment	Verify staff district employment records exist in both the district and state, checking for differences in the record's Start Date and/or End Date.
EmploymentAssignment	Verify staff district assignment records exist in both the district and state, checking for differences in the record's Start Date and/or End Date.
Enrollment	Verify student enrollment records exist in both the district and state, checking for differences in the following fields: Grade Level, Service Type, Start Date, End Date, Start Status and/or End Status.
Graduation	<p>Verify student graduation records exist in both the district and state, checking for differences in the following fields: Diploma Date, Diploma Type, Diploma Type (BIE), Date First Entered 9th Grade and/or NCLB Cohort Year. Verification will only check graduation records of students with a high school enrollment in the verified year.</p> <p>For proper reporting of graduation records, all high school grades must be mapped to a state grade that is matched to a federal NCES grade level of 9, 10, 11, or 12 in the stateGradeLevelDefinitions table</p>

Object	Description
LEP	Verify student LEP records exist in both the district and state, checking for differences in the following fields: Program Status, Identified, Expected Exit Date, Exit Date, First Year Monitoring, Second Year Monitoring, Parent Notified Date, Parent Declined.
PersonIdentity	Verify person/identity records exist in both the district and state, checking for differences in the following fields: Last Name, First Name, Middle Name, Gender, Birth Date, SSN, Person GUID, Race/Ethnicity, State ID and/or Staff State ID.
TestScore	Verify test scores of state published tests exist in both the District and State Editions, checking for differences in the following fields: Date, Scale Score, Raw Score and Percentile. Only test scores associated with the verified year will be checked.

The report will generate a summary of verification results similar to those appearing in the Verification Results editor. For example, the first page of the report might look like this (PDF example).

Timestamp	The date and time at which the verification last ran at either the district or state-level. Results always reflect the most recent generation. Clicking on the timestamp link will generate a PDF report of the verification results for the selected object.																																																																																									
(Total Records) Distinct	This column is a sum of the total number of records currently existing at the district, plus the total number of missing records that should exist at the district. Total Records: At District + Missing: At District = Distinct																																																																																									
(Total Records) At District	This column is the total number of records currently existing at the district level.																																																																																									
(Total Records) At State	This column is the total number of records currently existing at the state level.																																																																																									
Total Errors	This column is the sum of all missing records and differences. Missing: At State + Missing: At District + Differences = Total Errors																																																																																									
(Missing) At State	The total number of district-level records that do not exist at the state.																																																																																									

Column	Summary of Data
(Missing) At District	The total number of state-level records (related to the district) that do not exist at the district.
Differences	This is a count of the records existing at the district and the state where values in a key field differ. It is expressed as a total number of missing records subtracted from the total number of errors. Total Errors - (Missing: At State + Missing: At District) = Differences

Related Tools

Users may wish to analyze the data returned by this report in conjunction with the manual resync process of the [Resync State Data](#) tool.

The following reports (located elsewhere in the Campus product) are included within the Verification Summary tool. These reports are available as stand-alone reports only at the district-level:

- [State Enrollment Verification Report](#)
- [State Person Identity Verification Report](#)

State-level users may wish to view the [Verification Summary \(State\)](#) information.
