

Last Modified on 06/05/2024 1:19 pm CDT

As of Release Pack .1701, this tool will no longer be available once an LDAP configuration has been configured and enabled via the LDAP Authentication tab.

Please use the User Account Type Wizard to mass link user accounts to LDAP authentication.

Prerequisites | Linking All Student Accounts | Linking All Staff Accounts

**PATH:** System Administration > User Security > LDAP Management > Student Linker

The Student Linker tool allows system administrators to link all Campus student or staff accounts to LDAP accounts for a specific calendar or school year.

For detailed information about LDAP and how Campus connects user accounts to LDAP, view the **LDAP Authentication** article.

## **Prerequisites**

In order to access and properly use the Student Link tool, you must first have the following items:

- LDAP must be configured and enabled for your school/district.
- Staff and students must have a username in Campus that matches their username in LDAP in order to successfully link the Campus account to the LDAP account.
- You must have a Product Security Role Assignment of '**Student Information System**' (see image below). You cannot assign tool rights for this tool.

## **Linking All Student Accounts**

To link all student accounts within a calendar (or all calendars in a district) to LDAP, select a calendar in the Campus toolbar at the top of the screen and click the **Link Students** icon (see Image 2).

Link Student Acc	ounts

		, ,

Image 2: Linking Student Accounts to LDAP

Once account linking has finished processing, the tool updates and indicates how many students were linked and how many were unable to be matched between Campus and LDAP (No Match Found) (see Image 3).

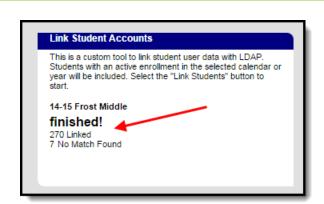

Image 3: LDAP Link Results

Infinite Campus

If you would like to look up which students were not successfully matched to LDAP, create the following filter within the Filter Designer Query Wizard tool (Image 4):

		-					
ort De	escript	ion: Find all of the stu	dents	that does not ha	ave a L	LDAP link.	
ong De	scripti	ion:					(+)
ilter th	ne dat	a					
	ID	*Field		Operator		Value

## **Linking All Staff Accounts**

To link all staff accounts within a calendar (or all calendars in a district) to LDAP, select a calendar in the Campus toolbar at the top of the screen and click the **Link Staff** icon (see Image 5).

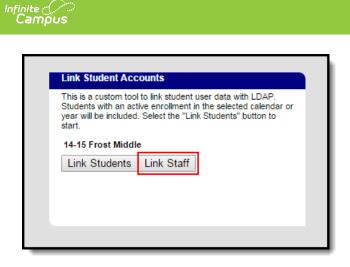

Image 5: Linking Staff Accounts to LDAP

Once account linking has finished processing, the tool updates and indicates how many staff were linked and how many were unable to be matched between Campus and LDAP (No Match Found) (see Image 6).

Link Student Accounts
This is a custom tool to link student user data with LDAP. Students with an active enrollment in the selected calendar or year will be included. Select the "Link Students" button to start.
