[Logic](#) | [Enrollment Field Descriptions](#) | [Other Sections](#)

Every year on the first business day in October, a snapshot of student enrollment data in the Bureau of Indian Education (BIE) is collected to satisfy Title 14 of the the Bureau of Education Code funding requirements. This count does not include students who enrolled after October 1st and is independent of the ISEP count that happens on the last Friday of October.

## Logic

This section of the BIE Consolidated Report Card & Individual School Report Card uses student data records stored on the [BIE Attendance Data Mart's](#) certification table.

Refer to the [BIE Attendance Data Mart](#) and [Data Mart Workflow](#) articles for more information about the data marts, their data tables and logic that is used.

### Report calculation used:

For each section, an overall percentage displays. This percentage is further broken down into demographic subgroups students may fall into. For each percentage displayed, the following calculation is used:

#### Individual School Calculation:

$$(\text{Population of students in subgroup} / \text{Population of 'All Students'}) * 100$$

#### BIE Calculation:

$$(\text{Population of students in subgroup across all BIE schools} / \text{Population of 'All Students' across all BIE schools}) * 100$$

## Enrollment Field Descriptions

If a subgroup has **ten or less** students, the subgroup will display a lock icon to protect student privacy and prevent student identification.

Data reported for the Enrollment section of the BIE Consolidated Report Card & Individual School Report Card is collected directly from the BIE Attendance Data Mart. Additional information about each of the fields included in this report can be found in the [BIE Attendance Data Mart Reported Fields](#) section of the [BIE Attendance Data Mart](#) article.
