[Logic](#) | [On-Track Attendance Field Descriptions](#) | [Other Sections](#)

On-track attendance shares the percentage of students who are not chronically absent. Students must be present and ready to learn to succeed academically. Chronically absent students are those students who are absent for any reason (excused or unexcused), such as illness or out-of-school suspension, for 10% or more of a school’s total school time between October 1 and May 31.

Logic

This section of the BIE Consolidated Report Card & Individual School Report Card uses student data records stored on the certification table of the [BIE Attendance Data Mart](#).

Refer to the [BIE Attendance Data Mart](#) and [Data Mart Workflow](#) articles for more information about the data marts, their data tables and logic that is used.

Report calculation used:

For each section, an overall percentage displays. This percentage is further broken down into demographic subgroups students may fall into. For each percentage displayed, the following calculation is used:

Individual School Calculation:

$$(\text{Population of students in subgroup} / \text{Population of 'All Students'}) * 100$$

BIE Calculation:

$$(\text{Population of students in subgroup across all BIE schools} / \text{Population of 'All Students' across all BIE schools}) * 100$$

On-Track Attendance Field Descriptions

If a subgroup has **ten or less** students, the subgroup will display a lock icon to protect student privacy and prevent student identification.

Data reported for the Attendance section of the BIE Consolidated Report Card & Individual School Report Card is collected directly from the BIE Attendance Data Mart. Additional information about each of the fields included in this report can be found in the [BIE Attendance Data Mart Reported Fields](#) section of the [BIE Attendance Data Mart](#) article.
