## Report Logic

[Attendance Calculations](#) | [Continuous in District/School](#)

Students are included in the report when a student has a primary enrollment in a state grade with an enrollment start date that is before the Effective Date. When the **Include Partial Enrollments**

checkbox is marked on the Extract Editor, partial enrollments in the selected calendar are also included.

Students are not included in this report when:

- Enrollment records are marked as No Show.
- Enrollment records are marked as State Exclude.
- Grade level is mapped to a state grade level of 002.
- Grade levels are marked as State Exclude.
- Calendars in which the student is enrolled are marked as State Exclude.

When the student's Start Status is 00: No/Not Applicable - summer dropouts only (reported in field 10, Entry Type) and when the student's End Status is 40: Discontinued schooling/dropped out (reported in field 12, Exit/Withdraw Type), these fields report as zeros up to the length of the field:

- Field 3, School Code (4 digits)
- Field 8, Entry Date (8 digits)
- Field 11, Exit/Withdraw Date (8 characters)

## Attendance Calculations

This report uses the Attendance Day Aggregation table for calculating attendance. See the following articles for more information on this table:

- [Attendance Aggregation Preferences](#)
- [Attendance Aggregation Refresh](#)

## Continuous in District/School

A student is considered **continuous in district** as long as the student had a primary enrollment as of the **Continuous in District Dates** and any primary enrollment from that date to the end of the school term, as long as the student was enrolled in all *instructional* days to the end of the school term. Multiple primary enrollments must be considered.

A student is considered **continuous in school** as long as they had a primary enrollment as of the **Continuous in District Dates** and any primary enrollment from that date to the end of the school term as long as the student was enrolled in all *instructional* days to the end of the school term. Multiple primary enrollments must be considered.

When the Continuous in School value reports as a 1 for a student, the Continuous in District value also reports as a 1.

Override fields exist on the [state reporting enrollment editor](#). Values chosen in those fields report. When there are no values chosen, the report follows this logic:
