Graduate Report Editor

Report Logic

- This extract reports all students who have a diploma date on the Graduation tab between the start and end date of the school year selected in the extract editor.
- To report, there must be at least one active enrollment that does not have any exclude flags tied to it.
- The report generates one record when the student has multiple enrollments at the same school in the school year being generated.
- When the student is enrolled in multiple schools in the school year being reported, a record will generate for each school.
- Only one record reports per student regardless of how many calendars the student is in or how many calendars the school has.

Report Editor Details

The following table lists the data elements available on the Graduate Report editor.

Field	Description
Ad Hoc Filter	Selecting a filter limits the results to only those included in the filter.
Format	The format in which the report should be generated. Options include HTML, Comma Separated and XML.
Calendars	The calendar(s) from which data is pulled for the report. Can be set to display only the active year's calendars, or be sorted by school or by year.
Generate Extract/ Submit to Batch	Users have the option of submitting a report request to the batch queue by clicking Submit to Batch instead of immediately generating the report by clicking Generate Extract . The batch process allows larger reports to generate in the background without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the Batch Queue article.
