The December 1 Child Count is submitted to the Kentucky Department of Education, which in turn submits the state aggregated data as well as local district and school level data to the United States Department of Education Office of Special Education Programs as required under IDEA-B 2004.

In addition, this count is used by the Kentucky Department of Education to determine the amount of the Exceptional Child Add-on to the Supporting Education Excellence in Kentucky (SEEK) funding formula for local districts.

This report is due to KDE on December 15th. Data should be submitted using the Secure File Transfer (DoSE Upload) Web Application.

Selection Criteria

Report logic only considers Special Ed plans and does not consider PLP plans. Special Education settings

and preferences are no longer controlled through the Enrollments tab. Special Ed settings and preferences should be made through the IEP Enrollment editor on the IEP.

Additional Reporting Logic

- Students will pull once per district in the final list. If a student has multiple valid enrollment records in the same district on the count date, the Primary enrollment is pulled.
- If multiple secondary enrollments exist in the same district, but no primary enrollment exists, then the following occurs:
 - The enrollment with the latest start date is identified.
 - If start dates match, the open-ended enrollment is selected over an ended enrollment.
 - If no open-ended enrollments exists, the enrollment with the latest end date is selected.
 - If all of the above criteria does not identify a single enrollment record, the enrollment with the most recent creation date is selected.

Generating the December 1 Count Report

1. Enter the **Effective Date**. Only data as of this date is reported.

This field defaults to Dec 1st of the school year selected in the Year field in the Campus toolbar. If Dec 1st falls on a Saturday or Sunday, the reported effective date is the Friday directly before 12/01.

2. Select the **Extract Type**.
 - **Student Count** - This extract type will generate the December 1 extract without running data validations. Users who generate the Student Count report in Batch Mode will need to run the Validation Report separately.
 - **Validation Report** - This extract type will generate and present a series of data validations prior to generating the December 1 extract.
3. Select the **Format** of the report. The State Format (CSV) should be selected if the report is being sent to the Department of Education. Use the HTML format to review data prior to submission to the state.
4. Select which **Grade(s)** will report data OR
5. Select an **Ad Hoc Filter**.
6. Select the **Calendars** to be included in the extract. Calendars can be viewed by active year, by school or by year. The calendar selection will be defaulted to the school selected in the Campus toolbar.

Understanding the Validation Report

An Error Report will generate before the final extract is generated. This error report will display warning and error groups. Students appearing in these five groups will display in the extract fields. The error report will only generate when run against the active school year.

Error 1

Error 1: The following records have a Reevaluation Due Date on or before the Effective Date, they will not be included in the report.

This warning excludes students who have a disability status of 15 (Developmentally Delayed) if those students have turned 9 on or before December 1 of the reporting year.

This warning displays students whose Reevaluation Due Date is prior to the Effective Date of the active reporting year. For example, if the Effective Date of the report is 12/1/08, students whose reevaluation due date is 11/30/08 or less and still have a Special Education status of *A* or *AR* will appear in this group.

Logic looks at the most recent locked CSR when calculating the Reevaluation Date.

Fields displayed: districtNumber, schoolNumber, SSID, lastName, firstName, reevaluationDate
