

Offense Extract (Massachusetts)

Last Modified on 10/22/2022 10:24 am CDT

[Report Logic](#) | [Generating the Extract](#) | [Extract Layout](#)

PATH: *MA State Reporting > Extracts > Offense Extract*

The Offense Extract collects records of Offenses that included Offender participants.

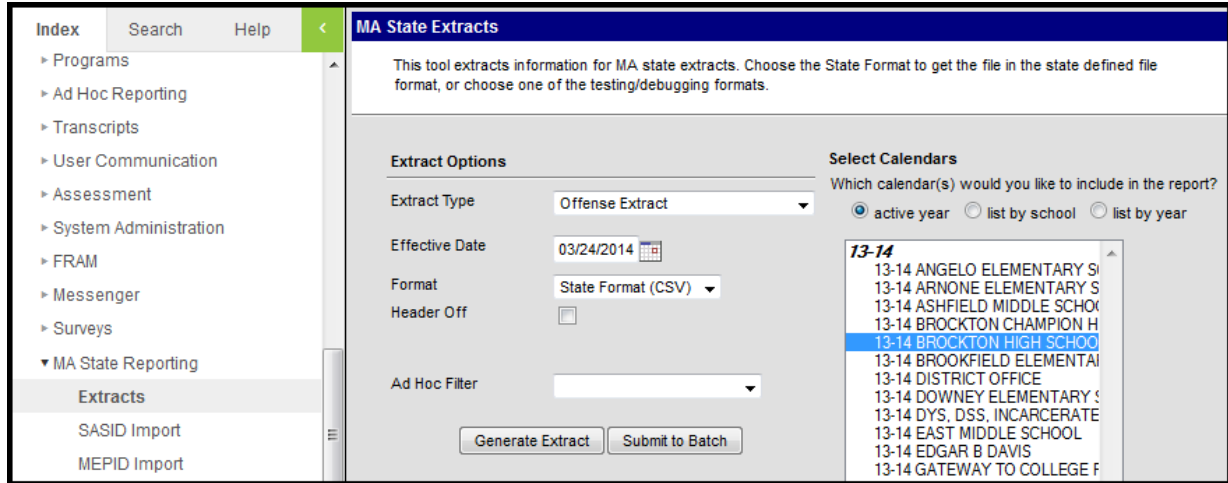

Image 1: Offense Extract Editor

Report Logic

A record will report for each Offense that meets the following conditions:

- The Date of Incident is on or after the first instructional day of the selected calendar.
- The Date of Incident is on or before the extract Effective Date.
- The participant has a Primary enrollment record on the 'Date of Incident'
- The participant is not enrolled in a grade level with Exclude marked.
- There is a participant involved in the Offense with a Role of O: Offender AND
 - A Behavior Event mapped to a State Code
 - OR
 - A Behavior Resolution with a state-mapped resolution
- Only report incidents within Behavior Management (Do not generate objects for any Behavior Referral).
- One record will populate for each Incident ID.
 - Data is only reported for the Primary enrollment record.
 - If more than one participant is assigned a Role of O: Offender, only 1 record will report per Incident ID.

Days are calculated between the Resolution Start Date and the End Date. When End Date is null, calculates the difference between Resolution Date and Enrollment End Date or the Resolution Start Date and the Return Date, whichever field has an earlier date. When Return Date is null, calculates the difference between the Resolution Start Date and the Enrollment End Date. When Enrollment End Date is null, calculates the difference between the Resolution Start Date and the extract Effective Date.

Generating the Extract

1. Select *Offense Extract* as the **Extract Type**.
2. Enter an **Effective Date** in *mmddyyyy* format or by clicking the calendar icon and selecting a date. This

- field will auto-populate to the current date.
3. Select the **Format** in which the report should generate. Select *State Format (CSV)* for submission to the state or *HTML* format for data review and verification.
 4. Mark the **Header Off** checkbox if the header row should not be included in the extract.
 5. Select an **Ad hoc Filter** to limit report results.
 6. Click **Generate Extract** to view the report in the selected format or **Submit to Batch** to schedule when the report will generate.

Users have the option of submitting an Offense report request to the batch queue by clicking **Submit to Batch** instead of Generate Extract. This process allows larger reports to generate in the background, without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the [Batch Queue](#) article.
