MSDS Extracts

Extract	Description	
General Collection	The MSDS General Collection Extract is used to gather student data largely from Enrollments, IEP's and Behavior meant to represent pupil membership counts and participation data.	
Early Childhood	The MSDS Early Childhood Extract is used to gather information about students receiving services through an entity or program that are funded through the state of Michigan, specifically reporting enrollments and exits for individual programs.	
Early Roster	The MSDS Early Roster Extract is used to gather projected student enrollment data for the upcoming school year, will not impact accountability and is required for creating a Direct Certification report.	
Request for UIC	The MSDS Request for UIC allows districts to obtain or validate Unique Identification Codes (State ID's) for their students.	
Student Record Maintenance	The MSDS Student Record Maintenance Extract is used to examine student data for changes and general data updates throughout the year, particularly for managing graduate data.	
Teacher Student Data Link	The Teacher Student Data Link reports the link between students and the teachers who instruct them.	
Third Grade Retention	The Third Grade Retention extract captures retention decisions for student targeted for retention according to the Read by Grade Three law (MCL 380.1280f).
