The General Collection Extract reports pupil membership count and participation data.

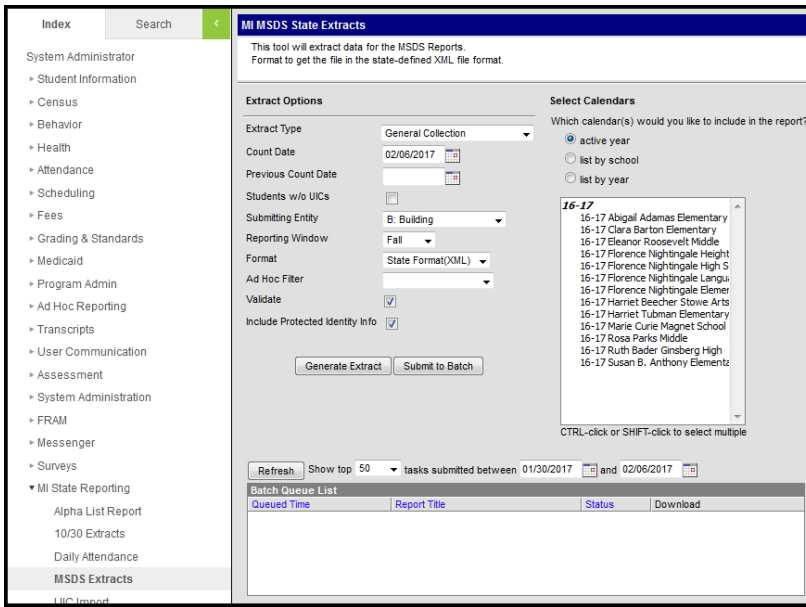

Image 1: MSDS General Collection

The General Collection is reported in three collection periods: Fall, Spring and End of Year. The following table describes collection period Reporting Windows:

Collection Period	Reporting Window	Count Dates
Fall	September 30 - November 4	Fourth Wednesday after Labor Day in September
Spring	February 10 - March 17	Second Wednesday in February
End of Year	June 30 - July 17	June 30th

Report Logic

A record is reported for any student that has an active enrollment record between the Previous Count Date and Count Date entered on the extract editor. The most recent enrollment record prior to the Count Date is used when reporting data.

Generating the Report

1. Select the General Collection **Extract Type**.

2. Enter the **Count Date** in *mmddyyyy* format or by clicking the calendar icon and selecting a date. A snapshot of data is taken as it exists on this date.
3. Enter the **Previous Count Date** in *mmddyyyy* format or by clicking the calendar icon and selecting a date. This date correlates with the Count Date entered. Student data will report within the date range entered in these two fields.
4. Check the **Student w/o UICs** checkbox, if desired. Checking this checkbox means only those students within the selected calendar(s) that do not have a State ID assigned will be reported. Not checking this checkbox means all students within the selected calendar(s) are eligible for reporting.
5. Select the **Submitting Entity**. This describes the entity submitting the extract to the state.
6. Select the **Reporting Window**. This is the collection and reporting window for which the generated extract is submitted.
7. Mark the **Include Special Education** checkbox to include the InitailIEP, SpecialEducation, and ECSpecialEdAssessmentType components in the extract.
8. Mark the **Include Early On** checkbox to include the EarlyOn, InitialIFSP, PartBReferral, PartCAssessment, and EarlyOnServices components in the extract.
9. Select the **Format**. For submission to the state, use the State Format (XML).
10. Select an **Ad hoc Filter** to limit records reported. When an Ad hoc Filter is selected, records report based on the options selected in the editor, not the Campus toolbar.

11. Check the **Validate** checkbox, if desired. Checking this checkbox means Infinite Campus will run a check on the XML data to validate that it is correct. If errors are found, the extract will list these errors for correction based on the schema.

> For guidance in validating the XML file against your state's schema using a free, third-party program, see the Validating an XML File Against a Schema File article.

12. Select which **Calendar(s)** to include within the report.
13. Click **Generate Extract** to generate the report in the indicated format or **Submit to Batch** to schedule when the report will generate.

Users have the option of submitting a report request to the batch queue by clicking **Submit to Batch** instead of Generate Extract. This process allows larger reports to generate in the background, without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the Batch Queue article.

For services that are not school-based (e.g., services provided in the home), reports how many days out of the days available that the student received services. The data populating this field for the end-of-year collection or at the student's exit from the district is a cumulative count of the student's attendance for the entire academic school year, as of the last day of attendance. All days that have a Status of A and an Excuse that is null or a value other than X are not included. Days with a Status other than A are included in the count. Only Whole Day Absences are subtracted from this count. Use the following calculation if student's enrolled grade has an MSDS Attendance Model that is Minute Based or null: • Whole Day Present, where student sum of absence minutes is 50% or less than the scheduled Instructional minutes for the day. • Whole Day Absent,	System Administration > Calendar > Days AND Student Information > General > Enrollments > Start Date and Service Type AND MI State Reporting > SRSD Extract > Previous Count date and Count Date Student Information > General > Enrollments > Grade Sys Admin > Calendar > Grade Levels > MSDS Attendance Model System Administration > Attendance > Attendance Codes > Status, Excuse System Administration > Calendar > Periods Course > Attendance System Administration > Calendar > Days > Instruction Calculated, not dynamically stored

Absent is defined by the attendance code combinations of Absent Excused, Absent Unexcused, and Absent Unknown. Attendance is calculated from the student's schedule in both of the following attendance models: • Course must be marked for Attendance. • Day must be marked as Instructional. If the student's enrollment has a Service Type of P or N and a Start Status of 01, 04, 07, 14, 15, 16, or 17, all attendance that falls between the Count Date and Previous Count Date is

If the student's enrollment has a Service Type of S and a Start Status of 01, 04, 07, 14, 15, 16, or 17, all attendance that falls between the Count Date and Previous Count Date is aggregated for all prior enrollments in the school year that had a Service Type of S, unless the enrollment has an End Status that is not 19 or null. If student exits the District and re-enrolls, attendance days are calculated from the latest enrollment. If start code is 01, 04, 07, 14, 15, 16 or 17, attendance should be aggregated from all enrollments from the same school for the school year. *Numeric, 3 digits*
