## Extract Options

Select the appropriate extract to generate from the **Extract Type** dropdown list. A List of available extracts is below. Users should also select the desired **Format** in which to generate the extract. Each extract can be generated in one of four formats:

- HTML
- XML
- CSV
- State Format (TSV)

When uploading extract information to the state, use the State Format (TSV) option. Other options are available for testing and data review prior to state submission.

The following extracts are available:
