Search Terms: Ed-Fi

This entity represents an educational organization that includes staff and students who participate in classes and educational activity groups. This field only accepts numeric values for the School ID so some states may implement a different State School Number for Ed-Fi. See state specific logic for more information.

Object Triggering Logic

This table describes logic for triggering syncing of this object.

Action	Trigger
Get	No Trigger, this is a look-up as schools are pre-loaded by DOE. When a new school is created and saved, it matches on the State School Number to determine reporting school.

Scope Year Logic

Data does not send for any of the resources if they reference a school that is marked as Exclude on the School editor.

Logic
Schools are not aligned to a year so all schools send to each scoped year with a valid configuration.
A resync must be completed on the resource when a new scope year is connected in order for this data to send.

Object Data Elements

This table describes data elements sent within the Schools resource.
