Search Terms: i4see Extracts

Following the close of school in June, all districts must provide data for each student who was enrolled in their district at any point during the prior school year. This submission includes non-special education students who were the responsibility of the school but placed out-of-district (including nonpublic schools in state and all schools out-of-state).

i4see Extracts

This tool will extract data to complete several formats of the New Hampshire State-defined i4see reporting extracts. Choose the State Format (CSV) to get the file in the state defined format, otherwise choose HTML for testing/debugging. Note: Prior to submission, you must remove the header row, if one exists, and save the file as a "comma separated file".

End of Year Enrollment Report Editor

Report Logic

Students who attend one or more days of school during the selected calendar year will report. All entry and exit dates will report for a student as long as Enrollment has End Date and End Status. It is possible for one student to have more than one record on this report.

Start and End Dates

- If a Start Date is entered on the Extract Editor, an End Date must also be entered. A warning

message displays indicating the need for the End Date.

- If an End Date is entered on the Extract Editor, a Start Date must also be entered. A warning message displays indicating the need for the Start Date.
- If a Start Date or End Date is not entered, the extract will generate for the entire school year for the selected calendar(s).
- If the Enrollment Start Date is on or after the Start Date entered on the report editor, the count is based on the enrollment start date.

Half Days in Attendance

Half Days in Attendance (field 16) reports the number of half days a student was in attendance during the selected school year. Only days where the student was in attendance for at least half of the school day are counted. If an exit date exists for this record, the half days in attendance include only half days between the entry and exit dates.

- In-school suspensions are considered days in attendance.
- Out-of-school suspensions are considered absences.
- Expulsions are not included as they fall after the Exit Date and before a re-Entry date.

Only instructional days in the selected calendar are counted, and only those days that are on or between the dates entered in the Start and End Date fields on the report editor.

- If a student's enrollment start date is after the report editor start date, the count is based on the student's enrollment start date.
- If the student has an enrollment exit date that is before the report editor end date, the count is based on the student's enrollment exit date.
- If the Percent Enrolled (FullDayPct) field is not null, it must be multiplied by the Half Days in Attendance total.
- If the student exited, only the days in attendance during the enrollment start and date are counted.

Any student with an enrollment start date and enrollment end date equal to the first day of school AND an enrollment status of 7, a value of 0 reports.

Percent Enrolled

When the Percent Enrolled field has a value and the Enrollment End Date has a value:

- All days are counted for that calendar that are instructional and where the day is after or the same day as the start date of the enrollment and before or the same day as the end date of the enrollment. Multiply by two.
- Subtract from that the sum of all absent half days.
- Multiply that by the Percent Enrolled divided by 100.

When the Percent Enrolled field has a value and the Enrollment End does not have a value:

- All days are counted for that calendar that are instructional and where the day is after or the same day as the start date of the enrollment. Multiply by two.
- Subtract from that the sum of all absent half days.

- Multiply that by the Percent Enrolled divided by 100.

When the Percent Enrolled field does not have a value and the Enrollment End Date does have a value:

- All days are counted for that calendar that are instructional and where the day is after or the same day as the start date of the enrollment and before or the same day as the end date of the enrollment. Multiply by two.
- Subtract from that the sum of all absent half days.

When the Percent Enrolled field does not have a value and the Enrollment End Date does not have a value:

- All days are counted for that calendar that are instructional and where the day is after or the same day as the start date of the enrollment. Multiply by two.
- Subtract from that the sum of all absent half days.

Half Days in Absence

Half Days in Absence (field 17) reports the number of half days the student was absent during the given school year. Only days where the student was absent at least half of the school day report. If an exit date exists for this record, the half days absent includes only half days between the entry and exit dates.

- In-school suspensions are considered days in attendance.
- Out-of-school suspensions are considered absences.
- Expulsions are not included as they fall after the Exit Date and before a re-Entry date.

Only instructional days in the selected calendar are counted, and only those days that are on or between the dates entered in the Start and End Date fields on the report editor.

- If a student's enrollment start date is after the report editor start date, the count is based on the student's enrollment start date.
- If the student has an enrollment exit date that is before the report editor end date, the count is based on the student's enrollment exit date.

Any student with an enrollment start date and enrollment end date equal to the first day of school AND an enrollment status of 7, a value of 0 reports.

Percent Enrolled

If the Percent Enrolled (FullDayPct) is not null, it is multiplied by the Half Days Absent total.

For every person/day with attendance/calendar/enrollment:

- When the difference between the period start time and the period end time minus the period lunch time minus the attendance present minutes is greater than or equal to the Half Day Absence value on entered on the Calendar or 180, the difference is greater than or equal to the whole day absence value or 240, the Absent Half Days value is 2.
- Otherwise, the absent half day value is 1.

Start and End Dates

- If a Start Date is entered on the Extract Editor, an End Date must also be entered. A warning message displays indicating the need for the End Date.
- If an End Date is entered on the Extract Editor, a Start Date must also be entered. A warning message displays indicating the need for the Start Date.
- If a Start Date or End Date is not entered, the extract will generate for the entire school year for the selected calendar(s).

Report Editor Options

Data Element	Description
Extract Type	Indicates the type of extract selected. Select E-O-Y Enrollment Report from the list of options.
Start Date	Beginning date of the student enrollment records. Dates are entered in <i>mmdyy</i> format or can be selected by using the calendar icon.
End Date	End date of the student enrollment records. Dates are entered in the <i>mmdyy</i> format or can be selected by using the calendar icon.
Ad Hoc Filter	Selection of previously made filter that contains specific students to include in the label request.
Report Format	Determines how the request is generated - in the State Format (CSV) or HTML. Use the HTML format when reviewing data. Use the State Format when submitting the list to the state.
Select Calendars	At least one calendar must be selected in order for the extract to generate. Calendars can be selected by the active year, by the school year, or by the year. Students in the chosen calendars are included in the extract.

Generate the E-O-Y Report

1. Select the **E-O-Y Enrollment Report** from the **Extract Type** dropdown list.
2. Enter the **Start Date** and **End Date** of the enrollment records to include.
3. Select an **Ad Hoc Filter** from the dropdown list to reduce the amount of students included in the extract.
4. Select the **Report Format**.
5. Select the **Calendars** from which to pull students in the report.
6. Click the **Generate Extract** button. The report will display in the selected format.
