Classic View: [NY State Reporting](#) > [SIRS Extracts](#) > [Day Calendar](#)

Search Term: SIRS Extract

The Day Calendar reports a record of all instructional days identified in each calendar selected on the extract editor.

See the [SIRS Extracts](#) article for directions for generating the extract.

Report Logic

- Instructional and non-instructional days are included.
- A record does not generate when a calendar or school level is marked as **Exclude**.
- All 365/366 days in the academic year tied to a calendar, including non-instructional days, are included in the output file.
- For calendars with multiple schedules, all distinct days are reported. Days that exist in multiple schedules within a calendar are only reported once.
- If multiple overlapping calendars are selected for the same location, the Day Type status will be determined according to the following logic:

If...	Then...
a calendar day has Instructional Day = Checked and No Day Event(s) exist	Instructional day reports
a calendar day has Instructional Day = Checked and a Day Event(s) exist, but none are correctly linked to a valid Standard Code	Instructional day reports
a calendar day has Instructional Day = Checked OR not Checked and a Day Event(s) exist, and (exactly) one is correctly linked to a valid Standard Code	the correct Day Event - linked standard code reports
a calendar day has Instructional Day = Checked OR not Checked and more than one Day Events exist, and more than one is correctly linked to a valid Standard Code	the Day Event with the lowest (closest to 1) sequence value reports out its linked standard code
a day does not exist as a calendar-defined day (i.e., a day falls outside of calendar date range OR a day within the calendar date range is updated to de-select all day information, such as Saturday), but is within the academic year identified by the selected calendar	"Other" reports

- If differing schedules are present, the Day Calendar reports a day for every state grade included in the calendar individually.

If...	Then...
<p>a single calendar with a single schedule structure is selected in the extract editor; OR a single calendar with multiple schedule structures is selected in the extract editor and all of the following match:</p> <ul style="list-style-type: none"> ◦ DE District Code ◦ DE Location Code ◦ DE School Year Date ◦ DE Day Type for all days across schedule structures <p>multiple calendars are selected in the extract editor and all of the following match:</p> <ul style="list-style-type: none"> ◦ DE District Code ◦ DE Location Code ◦ DE School Year Date ◦ DE Day Type for all days across calendars 	<p>a single record reports for each district day between July 1 and June 30 of the school year regardless of grade levels AL reports in the DE Location Grade Level field</p>
<p>a single calendar with multiple schedule structures is selected in the extract editor where:</p> <ul style="list-style-type: none"> ◦ DE Location Code and DE School Year Date match ◦ No two schedule structures have overlapping grade levels ◦ DE Day Type does not match for all days across schedule structures <p>multiple calendars are selected in the extract editor where:</p> <ul style="list-style-type: none"> ◦ DE Location Code and DE School Year Date match ◦ No two calendars have overlapping grade codes ◦ DE Day Type does not match for all days across calendars 	<p>A record reports for each grade level per day between July 1 and June 30 of the school year for the shared location code</p>
<p>multiple calendar or schedule structures are selected in the extract editor where:</p> <ul style="list-style-type: none"> ◦ DE Location Code and DE School Year Date match <p>DE Location Grade Level has multiple of the same value</p>	<p>a single line reports per distinct Location Grade Level per day between July 1 and June 3- of the school year for the shared location code</p>
<p>DE Location Code or DE School Year Date do not match</p>	<p>reports as separate calendars</p>

Extract Editor Field Descriptions

Field	Description
Extract Type	The extract to be run.
Format	The Format in which the report should generate. Options are State Format (CSV) and HTML. Use State Format for reporting information to the state and the other types for data review and verification.
Column Headers	Indicates whether Column Headers should be included in the report. This dropdown list applies to State Format (CSV).
Generate Extract/ Submit to Batch	Users have the option of submitting a report request to the batch queue by clicking Submit to Batch instead of immediately generating the report by clicking Generate Extract . The batch process allows larger reports to generate in the background without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the Batch Queue article.
Select Calendars	Identifies which Calendar(s) should be included in the report. Calendars can be sorted by active year, by school or by year.

Day Calendar Extract Layout

Element Name	Description	Type, Format, Length	Campus Database	Campus Location
District Code	The identification number of the district. The prefix "NY" is added to the district number. For example, if the district number is 662001, the District Code is NY662001.	Alphanumeric, 8 digits	District.number	System Administration > Resources > District Information > State District Number
Location Code	The Location Code for the school tied to the selected calendar.	Alphanumeric, 6 digits	CustomSchool.value	System Administration > Resources > School > School > Location Code
School Year Date	Default date is June 30 of the reporting school year. For example, if the 1314 Calendar is selected, the School Year Date is 2014-06-30.	Date field, 10 characters YYYY-MM-DD	Calendar.endDate	System Administration > Calendar > Calendar > Calendar > End Date
School Date	Reports each instructional day identified in System Administration.	Date field, 10 characters YYYY-MM-DD	Not Dynamically Stored	System Administration > Calendar > Calendar > Days

Element Name	Description	Type, Format, Length	Campus Database	Campus Location
Location Grade Level	If the school calendar differs by grade level within a location, this field reports one record for each grade level. Otherwise this field reports AL for all grade levels. See the Report Logic section for information on how this field reports.	Alphanumeric, 2 characters	Not Dynamically Stored	System Administration > Calendar > Calendar > Grade Levels > Grade Level Detail
Duration	This field reports blank.	This field reports blank.	This field reports blank.	This field reports blank.

Element Name	Description	Type, Format, Length	Campus Database	Campus Location								
Day Type	<p>Identifies whether the day is instructional. Campus uses the dates identified in in the School Date element then uses the Location Grade Level element to report the appropriate Day Type record according to the event(s) that occurred on a single calendar date. Each day may not have more than one unique Day Type per grade level per location.</p> <table border="1" data-bbox="384 801 743 1771"> <tr> <td data-bbox="384 801 564 1037">no Day Type is present AND Instructional IS marked</td> <td data-bbox="564 801 743 1037">this element reports Instructional</td> </tr> <tr> <td data-bbox="384 1037 564 1305">no Day Type is present AND Instructional is NOT marked</td> <td data-bbox="564 1037 743 1305">this element reports Other</td> </tr> <tr> <td data-bbox="384 1305 564 1541">a Day Type IS present</td> <td data-bbox="564 1305 743 1541">See the Report Logic section for more information.</td> </tr> <tr> <td data-bbox="384 1541 564 1771">Day has more than one Day Type selected</td> <td data-bbox="564 1541 743 1771">See the Report Logic section for more information.</td> </tr> </table>	no Day Type is present AND Instructional IS marked	this element reports Instructional	no Day Type is present AND Instructional is NOT marked	this element reports Other	a Day Type IS present	See the Report Logic section for more information.	Day has more than one Day Type selected	See the Report Logic section for more information.	Alphanumeric, 20 characters	Not Dynamically Stored	System Administration > Calendar > Calendar > Day > Day Detail & Day Events
no Day Type is present AND Instructional IS marked	this element reports Instructional											
no Day Type is present AND Instructional is NOT marked	this element reports Other
