

# Student Standing (FS) (Ohio Extracts)

Last Modified on 10/22/2022 10:34 am CDT

[Report Logic](#) | [Generating the Extract](#) | [Extract Layout](#)

The Student Standing (FS) extract describes the relationship of each student to the reporting district. Student Standing records are reported by a district for all enrolled students, students receiving/received services and/or students for whom the district has fiscal or other reporting responsibility.

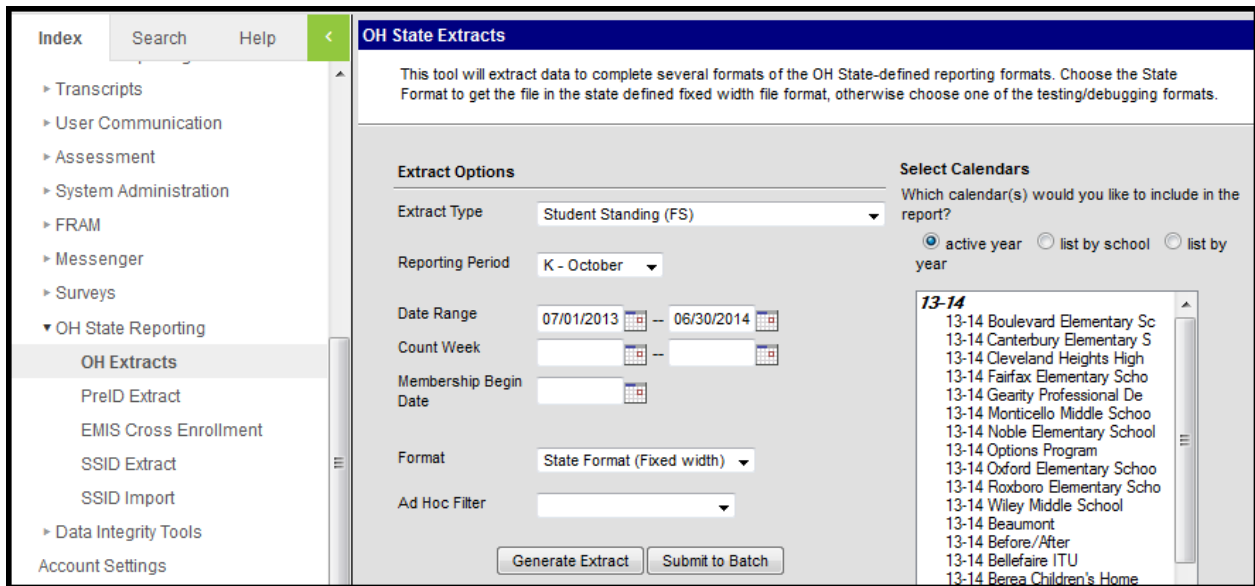

Image 1: Ohio Student Standing Extract

If a student's relationship with the reporting district is changed during the school year, their original Student Standing record is closed and a new record is opened. This means students may have more than one Student Standing record submitted during the reporting period however, only one Student Standing record can be considered open or active. Changes to the following extract elements require a student to begin a new record:

- Admission Date
- Admission Reason
- Assigned Building Area IRN
- Attending Building IRN
- District Relationship
- How Received
- How Received IRN
- Legal District of Residence
- Percent of Time
- Sent Reason
- Sent to IRN
- Sent to Percent of Time
- State Student ID
- Tuition Type
- Withdraw Reason

In order for a record to be considered closed, students must have their corresponding enrollment record End Dated.

## Report Logic

- If a student has multiple enrollments, a record reports for the enrollment with the highest Student Percent of Time entered in the State Reporting Fields. If this field is equal on two or more enrollments, reports the enrollment with a Service Type of P: Primary. If multiple enrollments have equal Student Percent of Time values and a Service Type of P, reports the most recently created enrollment.
- For the Graduate reporting period, one record should be reported for each student that attended and graduated from the district between the first day of the recently completed school year and the day before the first day of the upcoming school year.
- If a Prior SSID End Date is entered, a split record will report beginning on the day after the Prior SSID End Date. The Prior SSID End Date will report as the Effective End Date for the closed record.
- Attendance for Partial Enrollments is included in the calculations for the following fields. The day being calculated is determined by the Primary Enrollment record, but multiple partial enrollments can be included in the calculation. If the calculated absence for a day exceeds a Whole Day Absence, only one day will be subtracted. Whole Day and Half Day absences are calculated based on the calendar of the Primary enrollment. If a particular day of attendance includes both excused and unexcused absences, the absence that contains the most time for the particular day will be reported.
  - OctoberCountWeekAttendanceDays
  - OctoberCountWeekExcusedAbsenceDays
  - OctoberCountWeekUnexcusedAbsenceDays
  - SchoolYearAttendanceDays
  - SchoolYearExcusedAbsenceDays
  - SchoolYearUnexcusedAbsenceDays

## Calculating Attendance

For attendance to report, the following must be true:

- Period must be marked as Instructional to be included. Lunch time is not included.
- Courses must not be marked as Exclude from State Reporting.
- Calendar Day must be marked for Attendance and as Instructional.

Attendance is calculated based on the following logic:

- Calculated hourly (Total minutes divided by 60) and rounded to the nearest hundredth.
- Calculated based on the enrollment with a Service Type of Primary. If the student has multiple partial enrollments in the same district, daily attendance is aggregated for Primary and Partial enrollments.
- Calculated based on the student's schedule by comparing Roster Start and End Dates and Term Start and End Dates to Enrollment Start and End Dates.
- Absences are subtracted from the total possible membership for the day.
- Attendance fields are multiplied by the Enrollment Multiplier on the Enrollments tab. (As of Campus.1909)

- Times entered on the Calendar Day, and Day Events, override the standard period schedule when calculating attendance as follows:
  - If Day Start and End Times are entered, total daily membership is between those times.
  - If Day Start Time is entered but no End Time, total daily membership is between the Day Start Time and the End Time on the Period Schedule.
  - If Day End Time is entered but no Start Time, total daily membership is between the Start Time on the Period Schedule and the Day End Time.
  - If Day Start and End Times are blank, the day is not counted towards daily membership.
  - These Day Events adjust possible membership for the day: C\_DCMTYTKN, C\_DPLANNED, C\_DNOTPLAN, C\_HRSLENGTH, C\_HSHRTNOP, C\_HSHRTPLN, C\_HSHRTWEA, and C\_HRSWKEND. Day Events can apply to all grade levels in a calendar or to specific grade level/attendance pattern combinations. Grade level/attendance pattern Day Events are appended with a suffix of XXNN, where XX is the Local Grade Name and NN is the Attendance Pattern.

## Generating the Extract

1. Select *Student Standing (FS)* as the **Extract Type**.
2. Select the **Reporting Period**.
3. Enter a **Date Range** in *mmddyyyy* format or by clicking the calendar icons and selecting dates. These dates determine which student enrollments are reported, based on the Start and End Dates of enrollments within the selected calendar(s). The first date defaults to 07/10 of the calendar start year.
4. Enter a **Membership Begin Date** to indicate the Effective Start Date.
5. Select the **Format** in which the report should generate. Options are *State Format (Fixed width)*, *HTML*, *CSV* and *XML*. Use HTML, CSV or XML formats for data review and verification and State Format for submission to the State.
6. Indicate which **Calendar(s)** should appear in the report.
7. Click **Generate Extract** to generate the report in the indicated format or **Submit to Batch** to schedule when the report will generate. If generating multiple extracts at a time (after Campus.1921), requests can only be submitted to the Batch Queue.

Users have the option of submitting a Student Standing report request to the batch queue by clicking **Submit to Batch** instead of Generate Extract. This process will allow larger reports to generate in the background, without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the [Batch Queue](#) article.
