The Exiting Student Follow Up (FW) extract reports data from records on the [Follow Up Data \(FW\)](#) tab.

The FW extract editor.

Report Logic

A record reports for each student who has an [Follow Up Data](#) record with an Effective Date that falls during the extract Date Range. If a student has more than one record, data reports from the record with the most recent effective date. Records marked as State Data do not report.

Generating the Extract

1. Select the *Exiting Student Follow Up (FW)* **Extract Type**.
2. Select the **Reporting Period** for which the extract is being generated.
3. Enter the **Date Range** in *mmddyy* format or by clicking the calendar icon and selecting a date. Follow Up Data records with an Effective Date within this date range are reported.
4. Select the extract **Format**. For submission to the state, use the *State Format (Fixed width)* option. To review data prior to state submission, use any of the other available Format options.
5. Select an **Ad hoc Filter**, if applicable, to limit data based on an existing [Ad hoc filter](#)
6. Select which **calendar(s)** to include within the extract.
7. Click **Generate Extract** to generate the report in the indicated format or **Submit to Batch** to schedule when the report will generate. If generating multiple extracts at a time, requests can only be submitted to the Batch Queue.

Users have the option of submitting a FW report request to the batch queue by clicking **Submit to Batch** instead of Generate Extract. This process will allow larger reports to generate in the background, without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the [Batch Queue](#) article.
