The Fitnessgram Extract reports fitness data for students in grades 3-12 that have an active enrollment on the extract date and were enrolled in the course(s) selected in the extract editor at any time during the reporting period.

Example Fitnessgram Extract Editor

Report Logic

- Fitnessgram Extract reports all students in grades 3-12 that have an active enrollment on the

extract date and were enrolled in the course(s) selected in the extract editor at any time during the reporting period.

- If a student was enrolled in multiple applicable courses during the reporting period, one record reports for each course in which they were actively enrolled. For example, if a student was enrolled in a PE course in the fall and another in the spring and the report is for the entire year, the student will have two records--one for each course. Also, if the student dropped a three term course in term 1, only one record reports.
- Non-instructional courses are NOT excluded.
- Courses with the State Report Exclude option selected on the Courses tab (Scheduling > Courses > Course) do NOT report.

The following types of students **Do Not** report:

- Students marked as Exempt (Student Information > Enrollment > Physical Fitness Exempt).
- Students marked as State Exclude or are in a grade/school/calendar marked as Exclude.
- Students who do not have a state ID.
