The Student Discipline interchange is used to exchange discipline incidents and discipline actions. The exchange may be used to exchange student discipline data for student records or longitudinal analysis or used to exchange anonymous discipline data.

TSDS Extract Editor/Student Discipline Interchange

Report Logic

- A record is reported for each disciplinary action that results in the removal of a student from any part of their regular academic program.
- A single student will have multiple records if removed from their classroom more than once.
- Reported records are not based on whether or not a student has a Resolution Date entered which falls within the current school year. Records under this scenario would still report as the incident occurred within reporting school year.
- Every disciplinary action that results in the removal of a student from any part their regular academic program must be categorized as one of the following: In-School Suspension (ISS), Out of School Suspension (OOS), Expulsion, Juvenile Justice Alternative Education Program (JJAEP) or DAEP assignments.
- A record is reported for every behavior event with a 2-digit resolution code that occurred during the reporting school year. Resolution codes greater than 2 characters are not reported.
- To report, a Behavior record must have an entry in the Role field for the Role of Offender or Participant.
- If a student's enrollment has a Service Type of P, Primary, and a Service Type of S or N, data from the student's P (Primary) enrollment reports. If a student does not have a P, Primary, enrollment, then the enrollment that has a Service type of S or N that meets ALL other criteria reports.
- Summer School Enrollment data does not report.

Students who meet the following criteria are NOT reported:

- Students with an ADA Eligibility = 0 or blank.
- Students with no State ID.
- Students marked as State Exclude, in a grade level marked State Exclude or enrolled in a calendar marked State Exclude.
- Students marked No Show.

> Attendance Periods must be created in order for calendar information to be considered for state report.

Report Editor

Field	Description
Submission	3 - Summer
Interchanges	Interchanges are XML Schema Definitions (XSDs) which group related complex types. Select **Student Discipline**.
Effective Date	Only data as of this date reports. Default value is today's date.

Field	Description
Status	- Regular - Resubmission - Working Collection
Report Type	XML
Filter By	This field allows you to narrow the report results to specific Calendars, Calendar Years (District), or Schools.

Option	Description
Calendar	This option allows you to select the specific calendar(s) to include in the report.
District	This option allows you to select the specific Calendar Year to include in the report.
School	This option allows you to select the specific school(s) to include in the report.

Field	Description
Population	This option allows you to limit report results to Unique IDs. The Unique ID option only considers students with a Unique ID. The *All* option considers all students.
Ad Hoc Filter	Select an Ad Hoc filter to limit report results to those that meet filter requirements.
Report Generation	The report can be marked to generate immediately using the **Generate Extract** button or can be marked to generate at a later time using the **Submit to Batch** button. See the Batch Queue article for additional guidance.
