SIF (Utah)

Last Modified on 10/22/2022 10:39 am CDT

This article explains how the Utah SIF model has been set up, which objects and elements are being sent and the Campus configuration required to successfully use SIF on UT versions of Campus.

This article will explain the following items:

- Business Requirements
- Architecture
- Version
- Objects and Elements
- FAQ

Business Requirements

A SIF framwork is used in Infinite Campus to connect to the UTREx/Data Clearinghouse to gather and store student data throughout the year. Many of the student data elements collected through the UTREx data submissions are used in funding formulas for Minimum Schools Program (MSP). The data collected on October 1 are used for the legislative budget estimates each year.

Architecture

The Utah State Board of Education uses the eTranscript and Record Exchange (UTREx) to gather and store student data throughout the year.

Version

The current active SIF version in Utah is v2.4.

Objects and Elements

See the sections below for details about each SIF object and element.

- CalendarSummary
- DisciplineIncident
- LEAInfo
- SchoolCourseInfo
- SchoolInfo
- SectionInfo
- StudentAcademicRecord

- StudentAttendanceSummary
- StudentDemographicRecord
- StudentParticipation
- StudentPersonal
- StudentSchoolEnrollment
- StudentSectionEnrollment
- TermInfo

CalendarSummary

This object provides a summary of a school's calendar information for a given school year. In Utah, a CalendarSummary may only be reported once, regardless of the number of calendars associated with the school. Calendar information can be viewed and modified by navigating to System Administration > Calendar > Calendar > Calendar Info.

▶ Click here to expand...

DisciplineIncident

This object contains information related to the student discipline incident events. The discipline incidents can be viewed in the following locations:

- Behavior > Behavior Management > Incident Management Editor
