

# Location File (A) Extract (Washington)

Last Modified on 10/22/2022 10:40 am CDT

[Report Logic](#) | [Generating the Extract](#) | [Report Layout](#)

**PATH:** *WA State Reporting > Location File (A)*

The Location File (A) Extract generates a record for each district with an OSPI assigned County-District Code and each school within that district that has enrolled students.

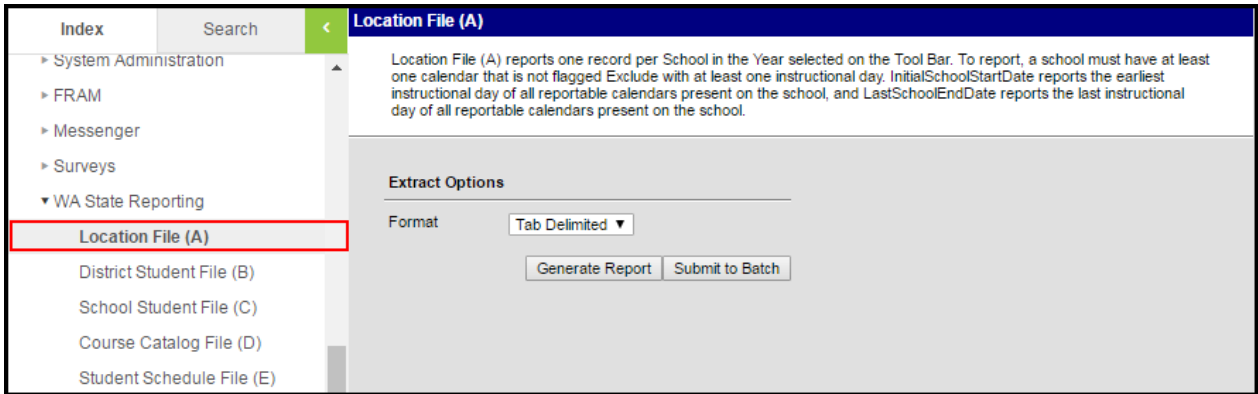

Image 1: Location File (A) Extract Editor

## Report Logic

Reports one record for each school in the Year selected in the Campus toolbar.

The school must have at least one calendar that is not flagged Exclude with at least one day flagged Instructional in order to report.

## Generating the Extract

1. Select the **Format** in which the report will generate, *Tab Delimited*, *CSV*, or *HTML*.
2. Click **Generate Extract** to generate the report in the indicated format or **Submit to Batch** to schedule when the report will generate.

Users have the option of submitting the report request to the batch queue by clicking **Submit to Batch** instead of Generate Extract. This process will allow larger reports to generate in the background, without disrupting the use of Campus. The generated extract is available in the Process Inbox For more information about submitting a report to the batch queue, see the [Batch Queue](#) article.

SchoolYear	CountyDistrictCode	DistrictName	LocationId	SchoolCode
2008	00802	Unit Test Washington	5100	5100
2009	00802	Unit Test Washington	5100	5100
2012	00802	Unit Test Washington	202	202
2012	00802	Unit Test Washington	5100	5100
