Wisconsin Ed-Fi Data v3.3 - Discipline Actions

Last Modified on 10/22/2022 10:41 am CDT

Classic View: System Administration > Ed-Fi

Search Terms: Ed-Fi

This event entity represents actions taken by an education organization after a disruptive event that is recorded as a discipline incident.

Object Triggering Logic

This table describes logic for triggering syncing of this object.

Action	Trigger

Post	Reports when a Behavior Resolution is added to an incident that is marked as Complete and is aligned to a reported Behavior Event.
	• Only report when role is mapped to the Ed-Fi Value: Perpetrator.
	• There is a resolution that is mapped to an Ed-Fi Value
	• Do not send if the student's enrollment is marked with any of the following:
	  ◦ No Show
	  ◦ State Exclude
	  ◦ WISE Exclude
	  ◦ Parent Placement Pri. School = Yes
	  ◦ School Override set to a different School from enrollment school
	• Do not send if the calendar is marked Summer School.
	• Do not send if the calendar is marked as exclude.
	• Do not send if the student is in a School marked as Exclude.
	• Only send a record if the Ed-Fi Config profile = Public.
	• Students with an active AND Locked IEP that overlaps the resolution start date AND Resolution in ISS, OS, EX, or ES (Ed-Fi codes 02, 03, 04).
	• IEP Print Format should start with WI IEP OR WI Imported Plan.
	• Students with NO active AND Locked IEP Must have a Resolution in OS, EX, or ES (Ed-Fi codes 02, 03, 04).
	• Only send a record if the students State Enrollment Type = Primary.
	• Report a separate record for each qualifying Resolution, even if they are attached to the same Student/ Participant.
	• Do not send a record for students who do not have an active locked IEP that overlaps the date of the incident and resolution AND the SPED Exit Date on enrollment is NULL or after the date of incident when they have a mapped discipline action (behavior resolution) <> OS, EX, or ES (Ed-Fi codes 02, 03, 04)
	  1. If the Resolution is mapped to IS: In-School Suspension, only report if the student has a locked IEP that overlaps the date of the Incident AND the SPED Exit Date on enrollment is NULL or after the date of the incident.
	  2. If SPED Exit Date on enrollment is after the enrollment start date and on or before the date of the incident, do not report.
	• Report any students who have any type of expulsion, which are codes 04 and 03.

Put	When any field not part of the Natural Key is changed.
Delete/Post	When data that is part of the Natural Key is changed. • If the resolution date is changed do a delete and post.
Delete	When the student's enrollment is no longer reportable; marked 1. No Show 2. State Exclude 3. WISE Exclude 4. Parent Placement Pri. School = Yes 5. School Override set to a different School from enrollment school 6. State Enrollment type is changed to not = Primary
Delete	When the participants are removed or Role is changed so there is no longer a perpetrator.
Delete	If the Discipline Action is deleted or modified so it is no longer eligible to report.

Action	Trigger
Delete	When the student's Student School Association is deleted.
Delete/Post	When the Incident's status is changed. • Delete when the status is changed from Completed to In Progress. • Post when the status is changed from In Progress to Completed.

School Exclude, Calendar Exclude, Resource Toggle and Resync Logic

This table describes the School Exclude, Calendar Exclude, Resource Toggle and Resync logic of this object.

Action	Trigger
None	If a resource is toggled to 'OFF' after data has sent, all sent data will remain in the ODS but no new data will send.
Resync	If a record is in the Ed-Fi Identity Mapping table and not in the ODS, it will be deleted from the Ed-Fi Identity Mapping table.
Resync	If a record is in the ODS and it does not have a matching record in Campus or the Ed-Fi Identity Mapping table, it will be deleted from the ODS.
Resync	If a mapping is changed in Resource Preferences, a resync will need to be done to reflect the changes.

Natural Key Changes, Cascading Updates, and Deletes Logic

This table describes the Natural Key Changes/Cascading Updates and Deletes logic of this object.

Action	Trigger
Post/Delete	Natural Key changes: • If an Ed-Fi ID changes, this will happen with the cascading deletes from the Ed-Fi ID Change trigger. • If the Discipline Date changes.

Scope Year Logic

This table describes scope year logic of this object.

Logic
Discipline records will only send to the school year they are aligned to.
Data will only send for the years that have valid configuration.

Resource Preferences

Data Element Label	Mapping Needed
Behavior Resolution Type	Discipline Descriptor
BehaviorResolution Modification Term and Reason	Modified Term Descriptor

Event Queue Detail

This table describes the Event Queue Detail of this object.

Campus Table	Ed-Fi Action	Fields
behaviorResolution	Post/Put/Delete	The primary table for sending data for this resource.

Object Data Elements

Data Element Labels in bold are part of the Natural Key and are required data elements for Data to send to Ed-Fi.

Data Element	Business Requirement	Business Rules	M,C, or O	Data Source GUI Path	Database Field
id	The unique identifier of the resource.		M		
disciplineAction identifier	Identifier assigned by the education organization to the discipline action.	Reports the Resolution ID.	M	Behavior> Behavior Management> Resolution> Resolution ID	BehaviorResolution
disciplineDate	The month, day, and year of the discipline action.	Reports the Resolution Start Date.	M	Behavior> Behavior Management> Resolution> Resolution Start Date	Behaviorresolution StartDate
disciplines	An unordered collection of disciplineActionDisciplines.	See array section.	M		
studentDiscipline Incident Associations	Reference to the DisciplineIncident associated with the DisciplineAction.	See array section.	M		
assignmentschool Reference	A reference to the related School resource.	This is optional, does not report.	O		
responsibility schoolReference	A reference to the related School resource.	Reports the fields that are part of the Natural Key for the Schools resource of the school where the incident occurred.	M		
studentReference	A reference to the related Student resource.	Report the reference from the Student record for the student associated with the Resolution.	M		

Data Element	Business Requirement	Business Rules	M,C, or O	Data Source GUI Path	Database Field
disciplineAction Length	The length of time in school days for the Discipline Action (e.g. removal, detention), if applicable. We must gather information to the 1/2 day. School days removed should be submitted in half-day increments. Do not count removals for less than 1/2 of a school day. For any removal of 1/2 school day in length or longer, round up to the nearest 1/2 day increment. For example, removals of 1/3 day would not be counted, 2/3 day would round up to 1.0, 1.2 days would round up to 1.5 days, etc. Under rare circumstances, zero may be valid for an expulsion. Do not count removals for less than 1/2 of a school day.' Expulsions may have length of 0 or greater. All other disciplines must have 0.5 or greater; do not round up to 0.5 for these other disciplines.	1. If the Resolution type is NOT mapped to EX (Expulsion) or ES (Expulsion with Services): ○ Report the Duration in School Days. ○ If Duration = 0 or NULL or < .5 days, do NOT generate a Discipline Actions record from this Resolution. ○ If Duration is > .5 days round to the nearest .5 day. Example: 2/3 day would be 1, 1.2 days would be 1.5 days. 2. If Resolution Type = Expulsion (EX) or Expulsion with Services (ES): ○ Check if Resolution End Date is after the Calendar End Date. ○ Check if a Return Date is entered. ▪ If return date is entered, calculate the length. See Appendix A for calculation. ▪ Otherwise, report the Duration in School Days. ○ Note: 0 length DOES report for these resolution types. 3. Report to 1 digit beyond the decimal. Decimal may be .0 or .5 only.	M	Behavior > Resolution > Duration in School Days Behavior > Resolution > Return Date Behavior > Resolution > Expulsion Reinstatement Date	BehaviorResolution duration behavior.resoultion SchoolDaysDuration behavior.returnDa

Data Element	Business Requirement	Business Rules	M,C, or O	Data Source GUI Path	Database Field
actualDiscipline ActionLength	Indicates the actual length in school days of a student's disciplinary assignment. Could be used to gather total length of expulsion, while length is just days is current school year. Action Length and actual action length, if used in the way, should always be identical for suspensions and IAES removals.	1. Report the Duration in School Days.	C	Behavior > Resolution > Duration in School Days Resolution Start Date Resolution End Date	BehaviorResolution duration
disciplineAction Length Difference ReasonDescriptor	Indicates the reason for the difference, if any, between the official and actual lengths of a student s disciplinary assignment.	1. This is optional, does not report.	O		
iepPlacement MeetingIndicator	An indication as to whether an offense and/or disciplinary action resulted in a meeting of a student's Individualized Education Program (IEP) team to determine appropriate placement.	1. This is optional, does not report.	O		
receivedEducation Services DuringExpulsion	An indication of whether the student received educational services when removed from the regular school program for disciplinary reasons.	1. This is optional, does not report.	O		
relatedToZero TolerancePolicy	An indication of whether or not this disciplinary action taken against a student was imposed as a consequence of state or local zero tolerance policies.,	1. This is optional, does not report.	O		
modifiedTerm Descriptors (wi_discipline ActionExtensionwi_ disciplineAction Extension)	Identifies if the duration of the expulsion has been modified from the federally required one year of expulsion for a fire arms incident.	1. If the Resolution type is mapped to EX (Expulsion) or ES (Expulsion with Services) report the Ed-Fi Value mapped to the Modification Term and Reason. 2. If Modification Term and Reason is blank, report "Firearms Incident Type and not modified OR not a firearms Incident Type'. 3. Do not report for resolutions that are not Expulsions.	C	Behavior > Resolution > Modification Term and Reason	BehaviorResolution modificationReaso

Data Element	Business Requirement	Business Rules	M,C, or O	Data Source GUI Path	Database Field

earlyReinstatement Condition (wi_disciplineAction Extensionwi_ disciplineAction Extension)	Following an expulsion, the student had early reinstatement condition to return to school prior to the end of the expulsion.	1. If the Resolution type is mapped to EX (Expulsion) or ES (Expulsion with Services)
		   ○ AND If Modification Term and Reason is NOT NULL, report TRUE.
		   ○ If Modification Term and Reason is NULL report FALSE.
		2. Do not report for resolutions that are not Expulsions.
			C	Behavior > Resolution > Modification Term and Reason	BehaviorResolution modificationReason

Discipline Descriptor	In-School Suspension-Non-disabled student given in-school suspension. Discipline information for this student should not be submitted to WISEdata. IAES Removals - IAES by School Personnel and IAES by Hearing Officer are given only to disabled students, therefor we should never receive IAES removals for students who are not disabled. Note - Only submit out of school suspension and expulsion data for non disabled students. Ed-fi allows one to many relationships. This is being modified to allow only 1 per discipline action. For ed facts reporting we must gather the following elements for each and every discipline (removal): discipline action length, action length difference, and for expulsion the set of extended fields. Expulsion and Expulsion with Services are separate ed-fi types, so this single element gathers removal type and services provided during expulsion. Multiple diciplineActions can be submitted for the same student associated to one disciplineIncident by submitting different disciplineIdentifier.	1. See array section.	M	Behavior Management > Resolution > Resolution Type	BehaviorResolution stateResCode

Data Element	Business Requirement	Business Rules	M,C, or O	Data Source GUI Path	Database Field
etag	A unique system-generated value that identifies the version of the resource.		O
