

Walk-In Scheduler: Complete or Change a Student's Schedule - Study Guide

Last Modified on 10/22/2022 10:45 am CDT

The Walk-In Scheduler can be used before school begins to complete a selected student's schedule. After school starts, the Walk-In Scheduler can be used to drop and add courses for a student, as well as build a schedule for a new student. Additional information is provided on related topics such as Academic Planning and Course Requests.

Academic Planning and Course Requests

You may want to review optional background information regarding Academic Planning and Course Requests prior to learning how to use the Walk-In Scheduler to complete or change a student's schedule.

Academic Planning

Schools can use Academic Planning to map out and manage the progression of each student's course of study throughout their high school career.

+ Documentation

Request Wizard

The Request Wizard is used to enter student course requests en masse. Student course requests appear in the Walk-In Scheduler after they have been entered.

Teacher-Entered Requests

Districts can allow teachers to submit future course requests on behalf of students in their current

course sections.

Complete Or Change Individual Student's Schedule

Walk-In Scheduler

The Walk-In Scheduler is used to manage schedule changes for a selected student.

Scheduling Messenger

The Scheduling Messenger allows schedule-related messages to be sent to teachers and staff associated with course sections on a student's schedule. The messenger can be used to notify staff when a student's schedule has changed.

Student To Student Constraints

Student to student constraints are used to alert schedulers that specific students cannot or should not be scheduled into a course section with each other. Warnings will appear in the Walk-In Scheduler when trying to place a student into a section that already includes a student with whom they have a constraint.

View And Print Student Schedule

Users may view and print student schedule information.
