Step 2. Create New Child Tests

Classic View: Student Information > Assessment Administration > Test Setup

Repeat this step THREE times. In the end, there will be three child test for the History/Government Assessment. Each child test uses the same Result Statuses. See the images for an example.

- The value for each code is a Raw Score that equates to a given performance level. For example, if a score of 1-49 is a performance level of 1, enter 1 as the value for Result Code'01 and a 50 as the value for Result Code 02.
- The Label for each code identifies which performance level for the result.

Note that the name of the test does not matter as reports look at the Code assigned to the test. As long as each test is easily identified as the appropriate score.

Code 01: Claim/Thesis
