The EOC SPRING Assessment reports the relationship of student performance to a defined level of achievement based on assessment achievement levels as follows:

- Below
- Basic
- Proficient
- Advanced

*MOSIS Pre-Code EOC Spring Assessment*

## Report Logic

A student reports for each unique Course Section combination that qualifies the student to report. A Primary Teacher or Teacher must be assigned to the course section.

The following logic applies to the EOC SUMMER Assessment:

- Reports students in grades 9-12 according to what is selected in the extract editor.
- Assessment Subject must be defined on the Course Editor.
- Assessment Type must be defined on the Course Section Editor.
- The reported term must have an end date that is greater than or equal to the start date entered on the extract editor
- The reported term must have a start date that is less than or equal to the end date entered on the extract editor.

## Report Editor

The following fields are available for the Pre-Code File Extract. Some options may not appear until the Pre-Code File Extract Type is selected.

Field	Description
<b>Extract Type</b>	Indicates the type of MOSIS Extract being generated. Choose <b>Pre-code File</b> .
<b>Report Protected Identities</b>	When marked, student identity information (last name, first name, etc.) reports from the Protected Identity Information fields.
<b>Report State Excluded Students</b>	When marked, students who meet the report population requirements but their enrollment record is marked as State Exclude report along with all other records.  When not marked, students marked as State Exclude on their enrollment record are excluded from the report.
<b>Date Range</b>	Entered date is used to return students actively enrolled as of that date.
<b>Ad hoc Filter</b>	Selection of a filter limits the set of students to only those included in the filter.
<b>Assessment Type</b>	Determines the pre-code file that generates. Choose <b>EOC SPR: EOC Spring</b> .
<b>Select Grades</b>	Indicates which grade levels are included in the extract. All grade levels can be selected, but the EOC Summer extract only reports data for students in grades 9-12.
<b>Format</b>	Determines the program used to display the report. State Format is in CSV - use this option when submitting data to the state. Use the other options or data review and testing - Tab Delimited, HTML, or XML.
<b>Calendar Selection</b>	Indicates from which enrollments are included in the extract. At least one calendar must be selected to generate the report. Calendars can be selected by active year, school name or year.
<b>Report Generation</b>	The report can be generated immediately using the <b>Generate Extract</b> button. When there is a larger amount of data chosen (several calendars, large date range, etc.), use the <b>Submit to Batch</b> button, which allows the user to choose when the report is generated. See the <a href="#">Batch Queue</a> article for more information.
