Report Logic

Events where the Date of Incident is on or within report generation date range. State Coded event must have an associated state coded resolution to report any records in the file.

C Records: A record reports for each participant with a role of offender associated with the behavior event. Multiple records can report if multiple offenders are associated with the state coded event.

A record reports per behavior event, per student. If all fields on a record are the same, these duplicate records are removed and only one record reports.

D Records: Multiple records can report if multiple resolutions are associated with the offender of

the state coded event.

- Multiple records can report for each Behavioral Intervention or Instructional Support's on a state coded resolution.
- A record reports for each state coded resolution associated with state coded event resolution information associated with the offender reporting in C record.
- A record reports for each Behavioral Intervention Code associated with the state coded resolution.
- A record reports for each Instructional Support Code associated with state coded resolution.
- A unique record is reported per Local Event ID, State Testing ID, Behavior Code, Behavioral Intervention Code, Instructional Support Code, Disciplinary Sanction Code, and Alternative Education Setting.
- **Note:** There must be a state coded event and state coded resolution in order to report. However, a record is reported when the resolution mapped to the state resolution = NONE.

Extract Fields

Field	Description
Date Range	The timeframe when data is pulled for the report.
A Records - Header	Include a header on the report.
B Records - Firearms and Weapons	Include firearms and weapons state coded events on the report.
C Records - Student Law Aggravating Flag	Include offender participant information on the report.
D Records - Resolution Type	Include resolution information associated with each behavior event on the report.
E Records - Victim Information	Include victim information associated with each behavior event reported from the B Record on the report.
Grade	Allows you to limit the results to only the selected grade(s).
Ad Hoc Filter	Allows you to limit the results to only the students included in the filter.
File Submission Type	The type of report. Options include: 03: End of Year, 09: Pre-submission, or 17: Preliminary.
Format	The format in which the report generates. Options include: CSV, Tab Delimited, or HTML
Calendar(s)	The calendar(s) from which data will be pulled.

Field	Description
Generate Extract OR Submit to Batch	Users have the option of submitting a Student Course report request to the batch queue by clicking Submit to Batch instead of Generate Extract. This process allows larger reports to generate in the background, without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the Batch Queue article.
