

# Pronoun Setup - WellSaidLabs Video

Last Modified on 05/03/2023 10:33 am CDT

This is a test video that copies AI audio into an existing video. I did a bit of editing trying to make the audio and video match up - the video was done in a previous version of camtasia, so some of my highlights/annotations were removed, and things don't look like they are lining up properly. But it's worth an example. And if we still need closed captions, they'll still need a lot of editing because it's not picking up the AI voice properly right off the bat. I didn't correct those so you could see what I mean.
