State Edition FIRST PASS LANDING PAGE

Last Modified on 05/09/2024 2:37 pm CDT

State Edition is an instance of the Campus software available for state Departments of Education (DOE) /State Education Agencies (SEA) that allows for data transfer to and from District Editions of Campus software with the state. SEAs can collect, distribute, and manage K12 data in real-time from all school districts across their entire state. Data can also be shared across Local Education Agencies (LEAs).

Depending on your particular state, the following tools are available. For additional information on the State Edition functionality at your state, see the State Specific Information section and select your state from the list.
