

Scheduling

Last Modified on 05/29/2024 3:55 pm CDT

Scheduling tools assist users in building schedules for the year.

Tool/Article	Description
Calendar Information	Calendar Details stores basic information about the calendar, including many fields which impact how the calendar is included within state reports and accountability calculations.
Courses	Information regarding Courses for State Editions.
Course Completion Data	State Editions of Campus can view course completion data for all state-linked districts.
State Course Codes	State Course Code functionality provides the ability to create and manage a set of state course codes at the state level.
Section Roster Import	The Section Roster Import allows users to import district-level student roster information into a State Edition of Campus.
